

ArcStone Launches Insi, a Groundbreaking Accessibility Plugin for WordPress

ArcStone launches Insi, a WordPress plugin that simplifies accessibility by scanning, flagging & fixing issues right inside WordPress.

MINNEAPOLIS, MN, UNITED STATES,
September 23, 2025 /

EINPresswire.com/ -- [ArcStone](#), a digital agency and certified B Corp committed to building a more inclusive web, is proud to announce the launch of [Insi](#), an intuitive new accessibility plugin designed for WordPress users. Built by designers and developers who prioritize accessibility in every project, Insi empowers web teams to identify, flag, and resolve accessibility issues—right within the WordPress environment.

“

We created Insi because we saw a gap in the market for a tool that brings insight and simplicity to web accessibility, especially for those working within WordPress.”

Nicholas Longtin

Unlike accessibility overlays that temporarily mask issues without fixing them, Insi addresses problems at their source. Users can scan website pages for both critical and potential accessibility violations, evaluate compliance with the latest [WCAG standards](#), and resolve issues—all in one place. The tool is designed to streamline workflows for web designers, developers, website editors and project managers.

Key Features of Insi:

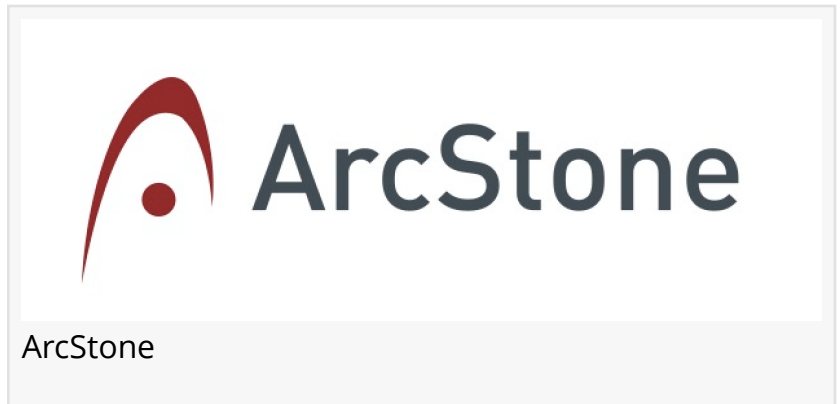

-Cloud based accessibility scanning that doesn't impact

website performance

- Review both published and draft content for accessibility issues
- Scan pages one at a time or in bulk
- Actionable insights and guidance for issue resolution
- No need to switch between tabs or third-party platforms

-Progress reporting and sitewide audit statistics

ArcStone is actively implementing Insi across client projects to uphold strict accessibility standards. This plugin embodies the agency's larger mission to create a more inclusive and equitable web for all users, regardless of ability.

“Too many tools in the marketplace promise compliance but fail to deliver lasting change,” added Longtin. “Insi is different—it’s built by people who do this work every day, for people who care about getting accessibility right.”

Insi is now available for use in WordPress websites. To learn more or request a demo, visit www.insihub.com.
