Rise in sales of personal & passenger vehicles, growth in consumer consciousness about vehicle safety, and enhanced customer offering drive the growth of the global dope dyed yarn for automotive market. However, batch wise production of dope dyed yarns restrains the market to some extent. On the other hand, rapid shift toward environment-friendly products and increase in automotive safety standards present new opportunities in the upcoming years.

The report offers detailed segmentation of the global dope dyed yarn for automotive market based on material type, denier type, application, and region.

Based on material type, the polyester segment held the highest market share in 2017, holding more than two-fifths of the total market share, and is expected to continue its leadership status during the forecast period. Moreover, the same segment is estimated to register the highest CAGR of 7.8% from 2022 to 2027. The report also analyzes the nylon segment.
