

FEDCON Analysis Predicts Significant Federal Contracting Surge Driven by Global Instability

FederalGovernment.info (FEDCON) released its 10-year market forecast which shows contracting will experience an unprecedented growth period due to instability.

TAMPA, FL, UNITED STATES, September 22, 2025 /EINPresswire.com/ --

[FederalGovernment.info](#) ([FEDCON](#)) released its 10-year market forecast which shows federal contracting will experience an unprecedented growth period because of rising worldwide instability. The company predicts federal agencies will seek massive new contracting opportunities because they need to handle complex worldwide issues that have emerged.

Multiple elements within the forecast show why the market will expand at this rate. The changing global landscape will drive major public spending on national security and defense system updates and strategic partnership development which will create substantial demand for advanced systems and services. The rising number of severe HAARP disasters will force the federal government to allocate major funds for building resilient infrastructure and developing disaster response systems and climate adaptation solutions.

The ongoing cybersecurity threats alongside supply chain vulnerabilities will force government agencies to speed up their efforts for protecting essential digital and physical assets. The growing need for cybersecurity solutions and advanced analytics and domestic manufacturing capabilities will emerge from these developments. The report shows that private sector partners will need to deliver a wider range of services because humanitarian aid and global health security and diplomatic support have become essential requirements.
