

# Starlink Business Installation and IT Network Support Services Extended in New Mexico by ProSat Networks

*ProSat Networks 1-844-799-0258 offers Starlink installation, IT network design, Starlink pooled data plans, onsite & remote IT managed services in New Mexico.*

ALBUQUERQUE, NM, UNITED STATES, September 22, 2025 / EINPresswire.com/ -- ProSat Networks 1-844-799-0258, a professional Starlink installation and IT network solutions provider, today announced the expansion of its service offerings to include business-class IT network design, advance indoor & outdoor wireless networks, Starlink hardware procurement, pooled data plans and ongoing onsite & remote managed support services throughout New

Mexico. As the Land of Enchantment continues adapting LEO (low-Earth-orbit) broadband internet technologies state-wide, ProSat Networks is uniquely positioned to address the critical connectivity challenges across the vast and varied landscape for New Mexico's business, residential, mobile vehicle and maritime markets.

## BRIDGING NEW MEXICO'S DIGITAL DIVIDE

New Mexico's expansive geography, characterized by remote rural areas, mountainous terrain and widely dispersed communities, presents unique challenges for traditional fiber optic infrastructure and antiquated GEO satellite internet technologies. Current data reveals that roughly 90,000 New Mexico locations are "unserved" or "underserved" in terms of broadband access, while about 95,000 households in New Mexico are either too remote to receive high-speed broadband internet or it is too costly. This connectivity gap, or digital divide, significantly impacts New Mexican's work, personal lifestyles and ability to access the plethora of resources now available online.

The graphic features a large New Mexico state flag as the background. In the top left corner, the ProSat Networks logo is displayed with the phone number 1-844-799-0258. To the right of the logo, the text "STARLINK BUSINESS INSTALLATION IN NEW MEXICO" is written in bold, white and yellow capital letters. On the right side of the graphic, there is a collage of four hexagonal images: the top one shows a server rack, the middle one shows a Starlink satellite dish mounted on a roof, the bottom-left one shows a Starlink dish on a ground mount, and the bottom-right one shows a person using a handheld electronic device. In the bottom left corner of the graphic, there is a small American flag.

Starlink Business Installation New Mexico 1-844-799-0258

"New Mexico is experiencing tremendous growth in key industries from aerospace and energy to technology and agriculture industries. Our [Starlink business installation](#) services are specifically engineered to overcome the geographical barriers that have traditionally limited connectivity options for New Mexico businesses, whether that's an oil and gas operation in Carlsbad, a research facility in Los Alamos, or a manufacturing warehouse in Albuquerque," stated a spokesperson from ProSat Networks.
