

## Fluoramics Expands HinderRUST Line with Two Innovative Products

Rust Converter for Metals and Clear Coat for Rusty Metals are now available

LEWISTON, MN, UNITED STATES,
September 30, 2025 /
EINPresswire.com/ -- Fluoramics, Inc., a
leading innovator in rust prevention
and lubrication solutions, is proud to
announce the launch of two new
additions to its <u>HinderRUST</u> product
family: HinderRUST Rust Converter for
Metals and HinderRUST <u>Clear Coat for</u>
Rusty Metals. These advanced
formulations are designed to provide
customers with powerful, easy-to-use
options for managing rust on both new
and aging metal surfaces.

The HinderRUST Rust Converter for Metals is engineered to chemically transform rust into a stable protective barrier, eliminating the need for Clear Coat for Rusty Metals

sandblasting or grinding prior to painting. This environmentally responsible solution penetrates rusted surfaces, halts further corrosion, and provides a solid foundation for topcoats or paints. Use for equipment maintenance, vehicles, tools, metal buildings, agricultural, marine, heavy equipment, and household applications.

Complementing this is the HinderRUST Clear Coat for Rusty Metals, a transparent protective coating that allows users to preserve the industrial, rustic look of metal while sealing out moisture and oxygen — the two main culprits behind corrosion. It offers long-term protection without altering the metal's natural appearance, making it ideal for applications where aesthetics matter just as much as durability. Use for equipment maintenance, agricultural, marine, household applications, automobiiles, motorcycles, sculpures, furniture, or art where you want to retain the unique, aged look of rusted metal.

"Rust is a persistent problem across industries, from construction and transportation to home repair," said Gregg Reick, President of Fluoramics. "By expanding our HinderRUST line with these two new products, we are providing customers with versatile solutions that not only stop corrosion in its tracks but also preserve the functionality and appearance of their metal assets."

Both products are easy to apply, VOC compliant, and safe for a wide range of industries and applications. With the introduction of HinderRUST Rust Converter for Metals and HinderRUST Clear Coat for Rusty Metals, Fluoramics continues its mission to deliver innovative, PFAS-free, and environmentally responsible products
