

Fluoramics Introduces 5-Gallon Pail Mixer for Small-Batch Applications

Mixer is built to same professional grade standards as its popular 55-gallon mixer

LEWISTON, MN, UNITED STATES, October 30, 2025 /EINPresswire.com/ -- Fluoramics, Inc., a leading manufacturer of high-performance lubricants, rust inhibitors, and application tools, today announced the launch of its new [5-Gallon Pail Mixer](#), designed to deliver the same professional-grade mixing performance as its popular [55-Gallon Drum Mixer](#), but in a more compact size for small-batch needs.

Built for efficiency, the 5-Gallon Pail Mixer is engineered to thoroughly blend coatings, lubricants, adhesives, and other high-viscosity products in standard 5-gallon containers. Featuring durable construction, chemical-resistant materials, and an easy-to-use design, this new mixer provides a reliable solution for shops, contractors, and industrial users who require consistent mixing results without the bulk of larger equipment.

The mixer is custom designed to mix 5-gallon pails of HinderRUST, Tufoil, paints, oils, and other liquids. It fits any drill or mixing motor with a 1.27 cm (.5 in) adjustable chuck. The mixer has two sets of welded blades that fold to fit through lid opening. When the drill spins, the blades unfold to stir the contents with a tornadic motion. Reversing the drill allows for a slower speed mix. Watch a [video](#) of the 55-Gallon Drum Mixer on YouTube to see a demonstration of the Drum Mixer in action. The new 5-gallon mixer is built to the same standards but in a smaller size.

Industrial, commercial, and manufacturing industries will appreciate the heavy-duty construction with a stainless-steel shaft and sturdy blades that are welded in place for superior longevity.

“Our customers love the performance of our 55-Gallon Mixer, but many told us they needed the same technology in a size that fits their smaller operations,” said Gregg Reick, President at

Fluoramics. “The 5-Gallon Pail Mixer was developed with those users in mind—compact, rugged, and designed to save both time and product waste.”

Key features of the 5-Gallon Pail Mixer include:

- Optimized for standard 5-gallon pails
- Heavy-duty stainless-steel shaft and blades
- Designed for use with pneumatic or electric drills
- Ideal for lubricants, rust inhibitors, paints, adhesives, and more
- Hardware is welded which means no risk of loosening nuts and bolts falling into the liquid

The introduction of the 5-Gallon Pail Mixer expands Fluoramics’ line of mixing solutions, giving customers the flexibility to choose the right tool for their specific batch size and application.

The 5-Gallon Pail Mixer is now available directly through Fluoramics and its authorized distributors.

“

Customers love our 55-Gallon Mixer and told us they need the same technology in a smaller size. This mixer was developed for them; it's compact, rugged, and designed to save time and product waste.”
