

Genisoft Web Launches FexaAI, an All-in-One AI Suite

Create text, images, and code faster with a unified, template-driven workspace built for marketing, product, and engineering teams.

ÉCHIROLLES, AUVERGNE-RHÔNE-ALPES, FRANCE, September 23, 2025 /EINPresswire.com/ -- [Genisoft Web](#) today announces [FexaAI](#), a unified platform that brings together text, image, and code generation in one intuitive workspace so teams can produce more, faster—and with consistent quality. Designed for marketers, editors, and developers alike, FexaAI streamlines ideation, drafting, and iteration to help businesses move from brief to publish-ready output in fewer steps. Learn more at <https://fexaai.com/>

With over 5,000 business clients, FexaAI establishes itself as the reference in automated professional content generation

“

With FexaAI, briefs become content—articles, visuals, even code—on a single canvas. Fast, practical, and editorial-quality, so ideas ship the same day.”

Lefi Abdelmonem

Built as a practical companion rather than another tool to manage, FexaAI centralizes everyday creation tasks, reduces switching costs, and keeps a coherent brand voice across channels. Its clean interface, specialized generators, and collaborative features support day-to-day production while leaving room for deeper customization when projects demand it.

Key capabilities

AI Generator (text, image, code, chat): produce articles, visuals, snippets, and drafts in minutes with prompts tuned for common workflows.

Custom templates: capture winning prompts as reusable, brand-safe templates for consistent output across teams.

Multilingual by design: generate and refine content in multiple languages to support international launches.

Activity & usage view: light analytics to understand what resonates and where teams save the most time.

Simple onboarding: no complex setup—log in, pick a generator, and start shipping content.

“Teams don’t need another silo—they need a single place where ideas become publishable content quickly,” said [Lefi Abdelmonem](#), founder of Genisoft Web. “With FexaAI, we focused on real-world speed and quality: a suite that handles the heavy lifting without getting in the way of creativity.”

Early use cases and benefits

Marketing & SEO: turn briefs into outlines, generate first drafts and headline/meta variations, and maintain tone consistency across landing pages and blogs.

Social media: produce multi-format variations—short posts, captions, carousel copy—while keeping messaging coherent by brand and campaign.

Product & engineering: draft code examples, helper functions, and technical snippets to speed documentation and prototyping.

Agencies & creators: package template libraries for client work; standardize outputs and reduce iteration cycles.

Why it matters

Content cycles keep accelerating while expectations rise for brand consistency and technical accuracy. By unifying generation, collaboration, and light analytics, FexaAI reduces iteration loops and helps stakeholders align earlier—especially for teams juggling websites, blogs, social channels, and product documentation.

Availability

FexaAI is available now at <https://fexaai.com/>

. New users can explore generators, create templates, and review activity from a single, modern dashboard.

About Genisoft Web

Genisoft Web is a digital agency based in Échirolles (Isère, France) specializing in web

development (notably PrestaShop) and SEO. The team helps SMEs and e-commerce brands build high-performing digital experiences and industrialize content operations.
