

# Data Centric Security Market Size to Reach \$39.34 Billion by 2030 | CAGR 30.6%

WILMINGTON, NEW CASTLE, DE, UNITED STATES, September 23, 2025 /EINPresswire.com/ -- As per the report published by Allied Market Research, [Data Centric Security Market](#) Size, Share, Competitive Landscape and Trend Analysis Report, by Component (Software & Solution Professional Services), Deployment Mode (On-premise and Cloud), Organization Size (SME and Large Enterprise), and Industry Vertical (BFSI, Government & Defense, Healthcare & Pharmaceuticals, IT & Enterprises, Telecommunication, Retail, and Others): Global Opportunity Analysis and Industry Forecast, 2020-2030.

The global data centric security market size was valued at USD 2.73 billion in 2020, and is projected to reach USD 39.344 billion by 2030, registering a CAGR of 30.6% from 2021 to 2030.

The rise in digitization trends and digital data production and increase in data privacy and security concerns with the Covid-19 pandemic has boosted the growth of the global data centric security market. However, high implementation costs and demands and less enthusiasm for data-centric security approaches in mainstream applications hinder the market growth. On the contrary, an increase in security concerns and cyber-attacks, and growth in cloud and digital media trends are expected to open new opportunities for the market players in the future.

Covid-19 scenario:

The Covid-19 pandemic had a favorable impact on the industry due to a sudden increase in the use of digital platforms and a surge in cyber-attacks.

The global adoption of work from home culture and greater digital data creation increased the demand for data centric security measures.

The report divides the global data centric security market on the basis of component, deployment mode, organization size, verticals, and region.

Based on components, the software and solutions segment held the largest share in 2020, accounting for nearly three-fourths of the market. However, the professional services segment is projected to manifest the highest CAGR of 31.8% during the forecast period.

On the basis of deployment mode, the on-premise segment held the lion's share in 2020, contributing to nearly two-thirds of the market. However, the cloud segment is estimated to portray the highest CAGR of 31.9% from 2021 to 2030.

The global data centric security industry is analyzed across several regions such as North America, Europe, Asia-Pacific, and LAMEA. The market across North America held the lion's share in 2020, accounting for nearly two-fifths of the market. However, the Asia-Pacific region is anticipated to showcase the highest CAGR of 33.2% during the forecast period.
