

Inspection Support Network (ISN) Introduces Major Feature Updates for Faster, Smarter Report Writing

New tools streamline inspections, expand templates, and simplify software migrations for home inspectors

SEATTLE, WA, UNITED STATES, September 24, 2025 /EINPresswire.com/ -- Inspection Support Network (ISN), the industry's leading home inspection software, has released a suite of updates designed to help home inspectors save time, reduce manual work, and create more professional, compelling inspection reports.

The ISN Report Writer remains at the heart of the platform, included in ISN's monthly volume-based pricing, and now benefits from performance improvements that make on-site and remote report creation faster and more responsive. Inspectors can quickly navigate large reports, manage photos and media without lag, and focus on delivering high-quality inspections.

To help inspectors write clearer, more engaging reports, the upgraded [Comment Library](#) now works alongside Narrative Comment Support, turning standard inspection notes into natural, client-friendly narratives. Teams can insert frequently used comments in seconds, ensuring consistent, professional reporting across every inspection.

ISN also continues to expand its library of inspection templates. The new [NPMA-33](#) Pest Control template allows inspectors to document wood-destroying insect inspections efficiently and in compliance, helping them perform a wider variety of inspections without additional setup or manual formatting.

As part of ISN's ongoing investment in its built-in report writer, the new Template Migration Tool makes it easy for inspectors to import their templates when migrating from two key platforms – Spector and HomeGauge, with more soon to follow. The new tool enables inspectors to retain their layouts, content, and workflow, and can be refined and customized within the ISN Report Writer, making migration faster, smoother, and less disruptive to existing inspection processes.

These updates reinforce ISN's ongoing commitment to providing a comprehensive, all-in-one inspection solution that helps inspectors save time, improve report quality, and expand service offerings. By combining intuitive workflow tools, new templates, and seamless migration options, ISN empowers inspectors to focus on what matters most – delivering exceptional

inspections and growing their businesses. ISN is the leading home inspection report writing and business management software platform, providing report writing, scheduling, financial reporting, payment processing, and automation tools for home inspection companies of all sizes. For more details on ISN's latest updates, visit the [ISN Blog](#).

About Inspection Support Network (ISN)

Inspection Support Network is one of the industry's oldest and most trusted software solutions for home inspectors, enabling more than one million inspections each year. ISN helps home inspectors ranging in size from sole proprietors to large multi-inspector businesses write inspection reports, build their company brands, automate workflows, and manage customer and agent relationships. With a comprehensive portfolio of easy-to-use tools, ISN empowers inspectors to simplify, streamline, and grow their businesses.
