

eDiscovery AI Launches CaseBot™ to Deliver Unlimited Insights, Instantly

New chatbot functionality within Insight ECI™ enables case intelligence to be conversational and continuous.

MINNEAPOLIS, MN, UNITED STATES, September 24, 2025 /EINPresswire.com/ -- [eDiscovery AI](#), an innovator in AI-powered legal technology solutions, today announced the launch of CaseBot™, a powerful chatbot now integrated into its flagship Early Case Intelligence™ solution, Insight ECI™. CaseBot represents a shift in the way legal teams interact with their data. Instead of running predefined outputs or one-time searches, CaseBot opens the door to unlimited insights. Attorneys and investigators can ask as many questions as they like about their data set – about events, people, concepts – and receive immediate, verifiable answers.

"CaseBot marks a fundamental change," said Jim Sullivan, Founder and CEO of eDiscovery AI. "Until now, insights were constrained to preconfigured reports or outputs. If you had more questions, you had to rerun the process. With CaseBot, you ask. There are no limits. Your case knowledge grows with every question."

“

CaseBot is the ultimate evolution of our early insight strategy. It transforms static outputs into dynamic conversations.”

*Tom Palladino, President of
eDiscovery AI*

CaseBot builds on the proven foundation of Insight ECI and Case Elements by making case intelligence truly interactive:

- Unlimited Questions: No need to rerun reviews or reports. Keep asking until you have the clarity you need.
- Instant Context: Answers are tied to source documents,

ensuring reliability and accuracy.

□ Faster, Smarter Workflows: What once took hours of searching now surfaces in seconds, dramatically reducing time and cost.

"CaseBot is the ultimate evolution of our early insight strategy," added Tom Palladino, President

at eDiscovery AI. "It transforms static outputs into dynamic conversations. Legal teams can explore their data continuously, uncovering what matters most within seconds."
