

IGadgets and Duotem collaborate on promoting The World's First Portable Hot & Cold Care Tool That Fits in Your Hand

Introduce the world's first portable and powerful hot AND cold care tool, designed to deliver instant, effective relief at the touch of a button.

GARDEN GROVE, CA, UNITED STATES, September 25, 2025 / EINPresswire.com/ -- [IGadgets](#) is pleased to announce its collaboration with [Duotem](#), with their team of experts of over 23 years of experience in product design and development at Samsung Electronics, to introduce [the world's first portable and powerful hot AND cold care tool](#), designed to deliver instant, effective relief at the touch of a button.

When it comes to recovery and self-care, nothing beats the timeless comfort of hot and cold therapy. Whether it's soothing heat for sore muscles or cooling relief for swelling, these simple remedies are essentials in every home. But traditional methods—like ice packs and plug-in heating pads—are inconvenient, messy, and often ineffective on the go.

Duotem combines dual hot-and-cold technology in one sleek, handheld device. It takes the guesswork, waiting, and hassle out of temperature therapy, giving you instant, targeted care that fits into your daily routine.

The World's First Portable Cooling AND Heating Device

Hundreds of Disposable packs

One Duotem

Duotem

Instant Heat, Instant Cold

Forget waiting for an ice pack to freeze or a heating pad to warm up. Duotem switches between hot and cold modes instantly, delivering therapy with precision. The technology cools rapidly as low as 14°F (-10°C) for injuries and swelling or heats up quickly to relax tension and stiffness. Duotem's heat mode provides heat relief with 3 heat modes ranging from 95 to 131°F (35-55°C).

True Portability

Duotem is lightweight, cordless, and rechargeable, designed to go anywhere. Slip it into its compact carrying case, and toss it in the gym bag or work tote. No need for bulky equipment, melted ice, or extension cords.

Targeted & Precise

Unlike ice packs or heating pads that spread temperature unevenly, Duotem's ergonomic head delivers therapy directly to the exact pain spot—whether it's a stiff neck, sore back, or aching knee. Duotem provides focused treatment without the mess, discomfort, or waste.

Long-Lasting Relief

Thanks to its powerful rechargeable battery, Duotem provides hours of use on a single charge. No need to constantly swap out gel packs or stay tethered to an outlet. Just charge with the included USB-C cable and enjoy reliable relief anywhere, anytime.

Eco-Friendly & Sustainable

Traditional disposable heat and cold packs generate waste and aren't always reusable. Duotem is built for the long haul, offering reusable therapy that reduces waste and saves money over time.

Designed for Comfort

Duotem was built with ease of use in mind. Its smooth, ergonomic grip makes it easy to hold, even during longer sessions. It's compact enough for kids, powerful enough for athletes, and intuitive enough for anyone to use—just one button to switch between hot and cold.

Safe & Reliable

With smart temperature control and built-in safety features, Duotem ensures that therapy is not only effective but also safe. Unlike microwaved heat packs that can overheat or ice packs that can cause skin burns, Duotem delivers stable, consistent temperatures designed to maximize comfort while minimizing risk.

Duotem isn't just another gadget—it's a reimagining of body care and treatment. With its compact, smart, and powerful design, it delivers the best of both worlds—heat and cold—in one revolutionary tool.

About Duotem,
Duotem team is comprised of experts with over 23 years of experience in product design and development at Samsung Electronics with a goal of making new, irreplaceable products. Currently, they are hard at work bringing to life their vision for products that solve the countless problems caused by heat.
