Prism PPM Recognized in the 2025 Gartner® Magic Quadrant™ for Adaptive Project Management and Reporting

NEW YORK, NY, UNITED STATES, September 25, 2025 / EINPresswire.com/ -- Prism PPM (formerly WorkOtter), a leading Project Portfolio Management (PPM) SaaS software, has been recognized as a Niche Player in the 2025 Gartner® Magic Quadrant™ for Adaptive Project Management and Reporting (APMR).

"We're incredibly excited to be included once again in this year's APMR Magic Quadrant," said Caitlin Bowen, CEO at Prism PPM. "Our abilities as a PPM platform continues to be rooted in our commitment to adaptive project management, combined with the innovative portfolio management tools leaders need to create more strategic Project Management Offices."

> "As we look to the future, Prism PPM will continue to capitalize on advancements in AI to develop and deliver for the PMO offices we serve ..."
>
> *Caitlin Bowen, CEO, Prism PPM*

According to Gartner, "the adaptive project management and reporting (APMR) market is defined as technologies that can support multiple delivery models to optimize project management practices and complex resource management needs across an organization."1

To support accelerating rates of change and continuous value delivery, these tools adapt to changing customer needs and governance approaches across multiple organizational designs and operating models. They provide multiple execution approaches that are grounded in value-based decision making and the time-to-value perceptions of their customers. Organizations need tools to support the integration of traditional project management practices alongside agile, adaptive, and hybrid ways of working while driving high levels of productivity from contributors and team members.

The dynamic and complex multiple organizational operating model design of all organizations makes the correct governance approach imperative, yet difficult to achieve. To drive

organization-wide outcomes, APMR tools need to support adaptive decision-making without incurring additional bureaucracy.

“As we look to the future,” Bowen added, “Prism PPM will continue to capitalize on advancements in AI to develop and deliver for the PMO offices we serve — creating in them the alignment that ties business objectives directly to decisions at the project level.”
