The report offers detailed a segmentation of the global dental handpieces market based on complete handpiece, handpiece component, end user, and region. The report provides an analysis of each segment and sub-segment with the help of tables and figures. This analysis helps market players, investors and new entrants in determining the sub-segments to be tapped on to achieve growth in the coming years.

Based on complete handpiece, the speed handpiece segment held half of the total market share in 2021, and is likely to maintain its leadership status during the forecast period. Moreover, the same segment is expected to manifest the highest CAGR of 6.2% from 2022 to 2031. The report also analyzes segments such as electric handpieces, surgical handpieces, and others.

By handpiece component, the electric motors segment held the largest share in 2021, accounting for more than two-fifths of the global dental handpieces market, and would rule the roost through 2031. However, the air turbines segment is estimated to witness the fastest CAGR of 6.1% during the forecast period.

Based on end-user, the hospitals segment held the largest share in 2021, accounting for more than three-fifths of the global dental handpieces market, and would rule the roost through 2031. However, the dental clinics segment is estimated to witness the fastest CAGR of 6.1% during the forecast period.

Based on region, the market in North America was the largest in 2021, accounting for more than two-fifths of the global dental handpieces market, and is likely to dominate the market during the forecast period. However, the Asia-Pacific region is expected to manifest the highest CAGR of 6.4% from 2022 to 2031. The other regions analyzed in the study include LAMEA and Europe.
