

AllScale × Yotta Labs: Co-building Real-World Stablecoin Tools on a Planet-Scale AI Fabric

AllScale and Yotta Labs team up to integrate AI and stablecoin tools, enabling faster, compliant global payments for SMBs and AI-powered apps.

SAN FRANCISCO, CA, UNITED STATES,
September 26, 2025 /

EINPresswire.com/ -- We're thrilled to announce our partnership with [Yotta Labs](#)! Together, we're co-building real-world stablecoin tools, accelerating adoption of compliant, intuitive stablecoin solutions, and empowering

SMBs and solopreneurs globally. By bridging ecosystems, we'll enable builders to ship faster: from AI training and inference to stablecoin invoicing, social commerce, and payroll.

About the Partners

[AllScale](#) — the stablecoin OS for global micro businesses. Our products cover invoicing, social commerce, and payroll. AllScale serves freelancers, solopreneurs, and SMBs in emerging markets with instant, compliant stablecoin settlement.

Yotta Labs — an AI-native OS that unifies geo-distributed, heterogeneous GPUs into a single elastic compute fabric for AI. The stack spans containerized GPUs, cross-cloud elastic deployment, serverless fine-tune, optimized Inference APIs, and one-click RL; bringing centralized-level performance and reliability to decentralized heterogeneous hardware.

How We Will Collaborate

- Hackathons, Builder Quests & Demo Days: hands-on tracks to prototype stablecoin + AI workflows (e.g., agentic invoicing, on-the-fly quoting, and analytics).
- Product Integrations: pair Yotta's distributed training/inference with AllScale's stablecoin rails to power AI-assisted billing, storefronts, and global payouts.
- Content & Community: joint technical deep dives, reference architectures, and builder office hours to fuel the growth of Web3-native businesses.

Why This Matters

- User Growth Synergy: Yotta's developer ecosystem meets AllScale's merchant base, expanding both builder and business adoption.
- Tech Complementarity: AI workload orchestration + decentralized GPUs combine with stablecoin invoicing/commerce/payroll to unlock real-world cashflow use cases.
- Brand Amplification: cross-channel programs and showcases highlighting working, compliant solutions for SMBs.

User Value & Shared Vision

- Lower payment friction & faster settlement for freelancers and SMBs.
- Do business in stablecoins with intuitive UX and compliant design.
- Build once, scale globally: AI-powered apps on Yotta's fabric, monetized and operated via AllScale's stablecoin OS.
