

[CAGR of 3.9%] Dolomite Mining Market Size to Grow by USD 2.7 Billion, From 2025-2031

The global dolomite mining market is projected to reach \$2.7 billion by 2031, growing at a CAGR of 3.9% from 2022 to 2031.

WILMINGTON, DE, UNITED STATES,
September 29, 2025 /

EINPresswire.com/ -- Allied Market Research published a report, titled, "[Dolomite Mining Market](#) by Mineral type (Calcined Dolomite, Sintered Dolomite), by Application

(Construction, Agriculture, Animal

Feed, Ceramics and Glass, Iron and Steel, Others): Global Opportunity Analysis and Industry Forecast, 2021-2031." According to the report, the global dolomite mining industry was estimated at \$1.8 billion in 2021, and is anticipated to hit \$2.7 billion by 2031, registering a CAGR of 3.9% from 2022 to 2031. The report offers an explicit analysis of the changing market trends, top segments, key investment pockets, value chain, competitive scenario, and regional landscape.

Drivers, restraints, and opportunities-

Rapid expansion of the global construction industry and infrastructure drives the growth of the global dolomite mining market. On the other hand, substitution of raw dolomites with igneous rock containing olivine minerals hamper the growth to some extent. However, rise in use of dolomites in the pharmaceutical sector is expected to create lucrative opportunities in the industry. The fact that dolomite is an effective supplement for individuals deficient in magnesium and calcium has increased its adoption in the sector.

The calcined dolomite segment to dominate by 2031-

By mineral type, the calcined dolomite segment contributed to around two-thirds of the global

dolomite mining market share in 2021, and is expected to lead the trail by 2031. The same segment is also expected to exhibit the fastest CAGR of 3.9% from 2022 to 2031. This is because calcined dolomite is widely used in the construction industry. The sintered dolomite segment is also analyzed in the market study.

The construction segment to maintain the lion's share-

Based on application, the construction segment generated nearly three-fourths of the global dolomite mining market revenue in 2021, and is expected to lead the trail by 2031. Developments in the construction industry and increasing reconstruction activities especially in North America and Europe fuel the segment growth. The ceramics and glass segment, on the other hand, would manifest the fastest CAGR of 8.0% from 2022 to 2031. This is attributed to the increased demand for high refractive optical glass and ceramic glazes on dinnerware. The other segments assessed across the report include agriculture, animal feed, iron and steel, and others.

Asia-Pacific garnered the major share in 2021-

Based on region, Asia-Pacific held the major share in 2021, generating nearly two-fifths of the global dolomite mining market. The same region would also garner the fastest CAGR of 5.1% by 2031. Increased population in the region has given way to heightened demand from the ceramics & glass industry, thus fostering the market growth. The other provinces analyzed throughout the report include North America, Europe, and LAMEA.

Key players in the industry-

Calcinor

Carmeuseo

Essel Mining & Industries Limited

Imerys

JFE Mineral Co., Ltd

Arihant Min chem

Lhoist

Liaoning Beihai Industry (Group) Co., Ltd.

E. Dillon & Company

Longcliffe

Nittetsu Mining Co., Ltd.

Nordkalk Corporation

RHI Magnesita GmbH

Sibelco

Omya AG

The report analyzes these key players in the global dolomite mining market. These players have incorporated various strategies such as expansion, new product launches, partnerships, and others to increase their market penetration and strengthen their position in the industry. The report is helpful in assessing the operating segments, their business performance & product portfolio, and so on.
