

Innovative VAPT Testing Solutions Empower Enterprises with Stronger Security and Compliance

IBN Technologies launches innovative VAPT testing solutions, helping enterprises prevent breaches, ensure compliance, and secure hybrid and cloud IT systems.

MIAMI, FL, UNITED STATES, September 29, 2025 /EINPresswire.com/ -- To counter the growing wave of cyberattacks, IBN Technologies has launched its state-of-the-art [VAPT testing](#) solutions to enable organizations to discover and fix vulnerabilities before they can be attacked. These state-of-the-art vulnerability assessment and penetration testing solutions integrate simulated real-world attacks and the newest network penetration tools to deliver unparalleled security assurance for organizations with cloud-native, hybrid, and distributed infrastructures.

IBN Technologies: VAPT testing

With more than 3,500 cyberattacks occurring every day, and well over 97% of successful breaches attributable to misconfigurations, the need for thorough vapt testing cannot be overstated. Using military-grade methodologies, AI-powered threat intelligence, and certified cybersecurity professionals, IBN provides businesses with the capability to mitigate threats, safeguard crucial infrastructure, and remain compliant with emerging regulatory requirements.

Protect your business with expert VAPT before attackers target you.

The Need for Advanced VAPT Testing

Cybersecurity alerts indicate disturbing trends: APTs growing 67% each year, zero-day exploits quadrupling, and cloud attacks surging. Enterprises risk business downtime, loss, and reputations without effective [penetration testing services](#). IBN's vapt testing model provides proactive protection by detecting vulnerabilities in applications, networks, cloud environments, and IoT devices.

Comprehensive VAPT Testing Portfolio

IBN Technologies tailored services span multiple domains, including:

1. Enterprise Web Application Security – Attack simulations, vulnerability elimination, and adversary-based testing.
2. Mobile Application Security – Cross-platform penetration testing, advanced risk assessments, and device hardening.
3. Network Infrastructure Assessments – Multi-layer penetration testing, firewall validation, and segmentation checks using advanced network penetration testing tools.
4. Cloud Security Reviews – Security audits for multi-cloud environments, Kubernetes, and serverless frameworks.
5. IoT and Edge Security Testing – Firmware analysis, industrial IoT validation, and supply chain risk mitigation.
6. Source Code & DevSecOps – AI-powered static/dynamic testing with secure SDLC and automated workflows.

Intelligence-Driven Cybersecurity

IBN integrates real-time threat intelligence, predictive vulnerability analytics, and advanced malware sandboxing to simulate real-world attacker behavior. Its team of certified ethical hackers (OSCP, CISSP, CREST) and red team specialists deliver customized penetration testing services that align security efforts with enterprise goals.

Business-Centric Security Approach

The program also includes executive-level reporting, compliance audits with remediation roadmaps, governance consulting, and seamless integration with SIEM platforms. Automated vulnerability workflows and real-time dashboards enable faster decision-making and continuous protection.

Proven Results from IBN's VAPT Testing

Organizations working with IBN Technologies report measurable results, including:

1. 92% elimination of critical vulnerabilities within 60 days
2. 70% faster incident response through proactive detection
3. Complete ransomware prevention across client systems
4. 55% improvement in audit and compliance scores
5. Zero successful breaches over two years

About IBN Technologies

IBN Technologies LLC is a global outsourcing and technology partner with over 26 years of experience, serving clients across the United States, United Kingdom, Middle East, and India. With a strong focus on Cybersecurity and Cloud Services, IBN Tech empowers organizations to secure, scale, and modernize their digital infrastructure. Its cybersecurity portfolio includes VAPT, SOC & SIEM, MDR, vCISO, and Microsoft Security solutions, designed to proactively defend against evolving threats and ensure compliance with global standards. In the cloud domain, IBN Tech offers multi-cloud consulting and migration, managed cloud and security services, business continuity and disaster recovery, and DevSecOps implementation—enabling seamless digital transformation and operational resilience.

Complementing its tech-driven offerings, IBN Tech also delivers Finance & Accounting services such as bookkeeping, tax return preparation, payroll, and AP/AR management. These are

enhanced with intelligent automation solutions like AP/AR automation, RPA, and workflow automation to drive accuracy and efficiency. Its BPO Services support industries like construction, real estate, and retail with specialized offerings including construction documentation, middle and back-office support, and data entry services.
