The outbreak of the pandemic had a negative impact on the global Chronic Hepatitis B(CHB) market. The outbreak of the pandemic in the majority of countries affected the supply chain and decreased blood donations across the world.

However, later on, several government initiatives to provide safer healthcare facilities and rise in blood donation rate for the treatment of Covid-19 with blood plasma helped the market recoup soon.

The global Chronic Hepatitis B (CHB) market is analyzed across Drug Class, Gender, Distribution Channel, and Region. The report takes in an exhaustive analysis of segments and their sub-segments with the help of tabular and graphical representation. Investors and market players can benefit from the breakdown and devise stratagems based on the highest revenue-generating and fastest-growing segments stated in the report.

Based on drug class, the antivirals segment contributed to 87% of the total market revenue in 2021, and is expected to dominate by 2031. The immune modulators segment, however, would manifest the fastest CAGR of 4.2% throughout the forecast period.

Purchase Inquiry:
