

Nexus App Brings Litecoin Users Novel Features Like Tor

New upgrade gives iOS & Android users more privacy & choice, without the complexity

SANTA MONICA, CA, UNITED STATES, September 30, 2025 /

EINPresswire.com/ -- The [Litecoin Foundation](#) is proud to deliver the first major upgrade to Nexus - the 'official' Litecoin wallet. Aligned with the Foundation's vision for sound money in the form of Litecoin, [Nexus Wallet](#) v1.1 focuses on delivering unprecedented privacy, without the complexity.

Nexus Wallet has reacted to global pressure on personal privacy by allowing freedom, control and choice for all users, no matter who they are or where they live. Among the update's new features is the ability for users to connect through the Tor network, helping combat censorship and geo-restrictions. As well as 'Coin Selection', which gives users choice over which of their coins use Litecoin's transparent ledger and which use opt-in privacy feature, MWEB. As well as plenty of updates providing greater usability, speed, profile customization and personal choice. And given it's only Nexus Wallet's first major upgrade, its fight for privacy is just getting started.

“

With this Nexus update we wanted to give users powerful features that feel effortless to use. With Coin Selection and Tor, you get advanced privacy tools in just a tap.”

*Loshan T., Lead Developer of
Nexus Wallet*
