

Levridge 2025 Release 2.0 Delivers Key Advancements Across Ag Sales, Accounting, and Equity & Patronage Solutions

Strengthens Bushel integration, adds flexibility to ag sales, expands freight tracking options, enhances mark-to-market inquiries, and improves usability.

FARGO, ND, UNITED STATES,

September 29, 2025 /

EINPresswire.com/ -- Levridge

continues to deliver powerful enhancements to the [Commodity Accounting](#), [Ag Sales](#), and [Equity & Patronage](#) solutions.

Powered by Microsoft Dynamics 365

The launch of Levridge 2025 Release 2.0 deepens the integration with Bushel, makes ag sales more flexible, expands the options available for tracking freight, improves mark-to-market inquiry options, and makes several features more user-friendly.

“This release reflects our ongoing mission to empower agribusinesses with innovative technology, helping them operate more efficiently and adapt to a rapidly changing industry” said John Melland, CEO at Levridge. “With every release, we listen, learn, and evolve—delivering enhancements that meet the real-world needs of agribusiness enterprises.”

Key Highlights of Levridge 2025 R2:

Bushel Integration – Invoices: Enables the sending of invoiced sales order lines with configurable filters to identify which items should be transferred, reducing unnecessary record transfers.

Credit and Rebill for Closed Periods: Allows users to select the date on which the credit and rebill process should be recorded when the original invoice falls within a closed fiscal period.

Composite Grade Enhancements: Improves the ability to update grades using a ticket number (without requiring a sample ID), enter multiple grades simultaneously for a sample, and save the entered grades.

Mark-to-Market Multiple Commodities and Flat Pricing: Supports the definition of default pricing

for non-board items and enables multiple commodities to be configured on a single mark-to-market price schedule, reducing the number of schedules needed.

Update Customer and Splits on Multiple Inbound Tickets: Provides flexibility to update customer accounts and split groups on inbound scale tickets, including the ability to select and mass update multiple tickets.

Long/Short Hedge Position Report - Add Drill back in Basis Section: Adds drill back functionality to the basis and adjusted basis company-owned fields in the long/short hedge position report, aligning with existing functionality in the cash section.

Levridge 2025 R2 is now available to all customers and partners. For a full breakdown of features, visit the Levridge 2025 Release 2.0 blog or explore the YouTube playlist for demos and walkthroughs.
