Clients only pay when a review is successfully removed."

The core services available through this partnership center on results-based services to remove negative, false, and/or defamatory reviews. Beyond removal, clients also have access to proactive review management solutions to generate more positive reviews, monitor their review profiles for any threats to their reputation, and professionally respond to reviews as they come in. Each program can be tailored to the unique needs of agents and organizations, helping them strengthen their online reputation and attract new clients.

Research shows that 90% of consumers read reviews before doing business, and a single negative article can cause a 22% customer loss, with three negatives pushing that number to nearly 60%. For insurance organizations, managing online reputation is directly tied to policyholder trust, agent recruitment, and retention. This partnership helps clients protect their reputations and grow with confidence.

The program is available immediately to insurance agents, agencies, FMOs, and carriers. Finalized pricing will be released at launch, with exclusive partner discounts available through Agent Review.
