

## Transdermal Drug Delivery Systems Market to reach \$87.3 billion by 2030

PORTLAND, IN, UNITED STATES, September 30, 2025 /EINPresswire.com/ -- According to a new report published by Allied Market Research, titled, "<u>Transdermal Drug Delivery Systems Market</u>," the transdermal drug delivery systems market size was \$52.5 billion in 2020, and is estimated to reach \$87.3 billion by 2030, growing at a CAGR of 4.9% from 2021 to 2030.

The rise in global geriatric population has significantly increased the demand for efficient and effective drug delivery systems. Furthermore, changing work culture and lifestyle across the globe has significantly increased the number of patients suffering from chronic diseases such as heart diseases, diabetes, and arthritis. In addition, advancements in transdermal drug delivery systems have enabled in use for delivery a wide range of medicines. Also, major companies in the industry are focused on development of more advanced and efficient transdermal drug delivery systems.

Increase in global population & geriatric medicine and rise in number of patients suffering from chronic diseases including heart diseases, arthritis, and diabetes have boosted the growth of the global transdermal drug delivery systems market. In addition, advancements in transdermal drug delivery systems would open new opportunities in the future.
