

Dynamic Sky Launches Validate45: Safeguarding Hundreds of Millions in 45Q Credit Claims

PROVIDENCE, RI, UNITED STATES,
October 1, 2025 /EINPresswire.com/ --
[Dynamic Sky](#) today introduced
Validate45, a platform designed to
protect the \$100M+ in at-risk revenue
faced by carbon capture, utilization,
and storage (CCUS) projects under
Section 45Q of the Internal Revenue
Code.

The 45Q tax credit offers up to \$85 per
metric ton of CO₂ permanently stored,
but eligibility requires more than
injection and monitoring. IRS statutes
demand a wide scope of verifiable
data: prevailing wage and apprenticeship compliance, quarterly CO₂ volume reconciliation
across multiple parties, and adherence to evolving EPA and Treasury rules.

Jordan Levine, Founder, Dynamic Sky

Unlike typical corporate tax credits, where tax teams begin preparation twelve months before
filing, CCUS credits require planning three to five years in
advance. Successful filing requires:

“

Without a structured
compliance-to-credit
process, companies risk
forfeiting hundreds of
millions in credits.
Validate45 ensures that
never happens.”

*Jordan Levine, Founder,
Dynamic Sky*

- Clear data collection accountabilities across operators, transporters, and storage entities.
- Flow-down contract clauses ensuring every party complies with reporting requirements.
- A defensible system of record consolidating technical, financial, and legal evidence over the project’s lifespan.

“While the technical challenges of CCUS get attention, the data and compliance burden also threaten project economics,” said Jordan Levine, founder of Dynamic Sky.

“Without a structured compliance-to-credit process, companies risk forfeiting hundreds of

millions in credits. Validate45 ensures that never happens.”

Jordan Levine, Dynamic Sky, added: “Validate45 removes the stress and anxiety associated with the complex and multi-lateral 45Q filing by providing a one-stop shop for operators, tax departments, and tax auditors to clearly see all data requirements and whether they are met.”

Validate45 provides:

- Multi-party system of record for injection, transport, storage, wage, and apprenticeship data.
- Quarterly reconciliation engine to match CO₂ volumes between capture, transport, and injection parties.
- Audit-ready compliance outputs aligned with IRS Form 8933 and Subpart RR MRV requirements.
- Dynamic rule updates to adapt to changing government regulations.

By aligning MRV filings, labor compliance, and tax reporting in one platform, Validate45 transforms compliance into confidence—and protects the economic foundation of large-scale CCUS projects.

About Dynamic Sky

Dynamic Sky provides supply chain solutions and data integration applications for high-value multi-entity projects.
