

# Pre-Orders Opened on October 9 for Jurassic World Mosasaurus "Lagoon" Statue

*Prime 1 Studio announced Jurassic World Mosasaurus "Lagoon." Pre-orders began on October 9, 2025 (JST), with release set for April 2027.*

ASAKUSA, TAITO-KU, TOKYO, JAPAN,  
October 10, 2025 /EINPresswire.com/ --  
From the 2015 film "Jurassic World,"  
the Mosasaurus joins the Legacy  
Museum Collection.

This new statue follows the earlier  
release that depicted its leap from the  
pool, and now features an underwater  
theme. The composition shows the  
Mosasaurus with its tail rising above  
the water while pursuing its prey,  
conceived with reference to scenes and  
visuals from the film. It is produced at  
1/15 scale.

The statue measures nearly one meter  
in length. Sculpting and paintwork  
highlight details such as its open jaws  
with sharp teeth, the texture of its  
membranes, and the irregular patterns  
of its skin. Layers of bluish-gray  
coloring are used to reflect the  
impression of underwater light. Clear  
parts are applied to the dynamic spray  
at the tail to create variation in angle and tone.

The base is designed to represent the lagoon environment, with red and blue corals, small fish, and a great white shark. The front of the base displays the Jurassic World logo.
