

Hatcher+ and Yainvest Partner to Bring AI Behavioral Finance Analytics to FFAST®

Collaboration integrates Yainvest's Investor Behavior Impact (IBI)™ tool into Hatcher+ FFAST®, enhancing decision-making and portfolio outcomes.

SINGAPORE, October 6, 2025

/EINPresswire.com/ -- [Hatcher+](#), a

Singapore-based global leader in AI-driven fund management technology, today announced a strategic partnership with Yainvest, a Swiss-based innovator in behavioral finance analytics. This collaboration will

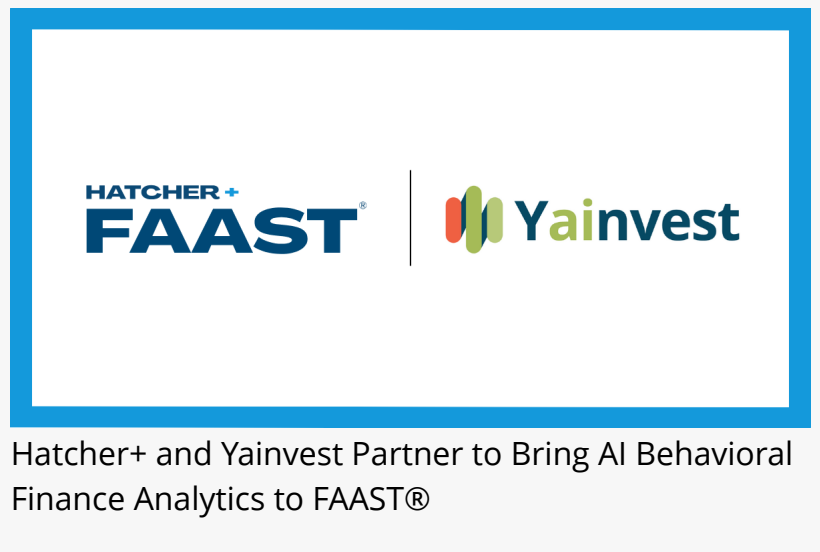

integrate Yainvest's advanced Investor

Behavior Impact (IBI)™ tool into the Hatcher+ [FFAST®](#) (Funds-as-a-Service Technology) platform, delivering groundbreaking insights into investor decision-making and portfolio performance.

This partnership enables regulated wealth, asset managers and family offices to harness the power of Yainvest's behavioral analytics directly through the FFAST® ecosystem. By identifying and addressing behavioral biases in real-time, the integration helps investors make better-informed decisions, refine portfolio management strategies, and achieve stronger long-term results.

The integration of [Yainvest's IBI™](#) tool introduces a unique behavioral dimension to portfolio analytics. Yainvest's advanced methodology quantifies the impact of cognitive biases such as overconfidence,, herding, and the disposition effect on portfolio returns. With actionable insights and recommendations, investment professionals can proactively guide clients toward more rational and disciplined investment approaches.

A key feature of Yainvest's IBI™ tool is its AI-powered approach, combining decades of academic research with a solid mathematical foundation to deliver reliable, transparent, and actionable analytics. Hatcher+ clients can now seamlessly access these capabilities through the FFAST® platform, enhancing their ability to deliver personalised, data-driven investment strategies.

John Sharp, Co-Founder and Managing Partner at Hatcher+, expressed his enthusiasm about the partnership: "Partnering with Yainvest aligns perfectly with our mission to bring the most advanced tools to wealth managers and family offices. By integrating Yainvest's cutting-edge behavioral finance technology into FFAST®, we are equipping our clients with deeper insights to help their investors achieve greater success and satisfaction."

Enrico De Giorgi, Co-founder and Member of Board of Directors of Yainvest, echoed this sentiment, stating, "The partnership with Hatcher+ aligns with our mission to make our services accessible to investors in search of personalised strategies that meet their expectations. By addressing behavioural aspects and continually leveraging data-generated insights, our goal is to ensure investors' long-term positive outcomes with their wealth managers."

Expanding Market Reach

Yainvest will also serve as an official reseller of the FFAST® platform, broadening Hatcher+'s reach in key global markets. Through Yainvest's established relationships with leading financial institutions, the partnership is set to accelerate adoption of Hatcher+'s fund administration technology, including AI-driven deal origination, fund creation, and real-time reporting.
