

IBA Group's tapXphone Confirms PCI MPoC Compliance

IBA Group's SoftPOS solution tapXphone passes its first annual PCI MPoC Software compliance checkpoint

PRAGUE, CZECH REPUBLIC, October 2, 2025 /EINPresswire.com/ -- [IBA Group's SoftPOS solution tapXphone](#) has passed its first annual PCI MPoC Software compliance checkpoint. The continuous compliance of tapXphone with security requirements confirms that the company follows the mission to create secure and easy-to-use payment acceptance technologies that are accessible to all.

In 2024, tapXphone became one of [the first 10 solutions in the world](#) to meet the PCI MPC security requirements. To date, the product holds all key security certifications required for SoftPOS solutions, namely

“

The processes built into tapXphone are effective, competent, and meet all requirements. We will continue to give special attention to security.”

Vadzim Smatrayeu, VP Fintech Services at IBA Group

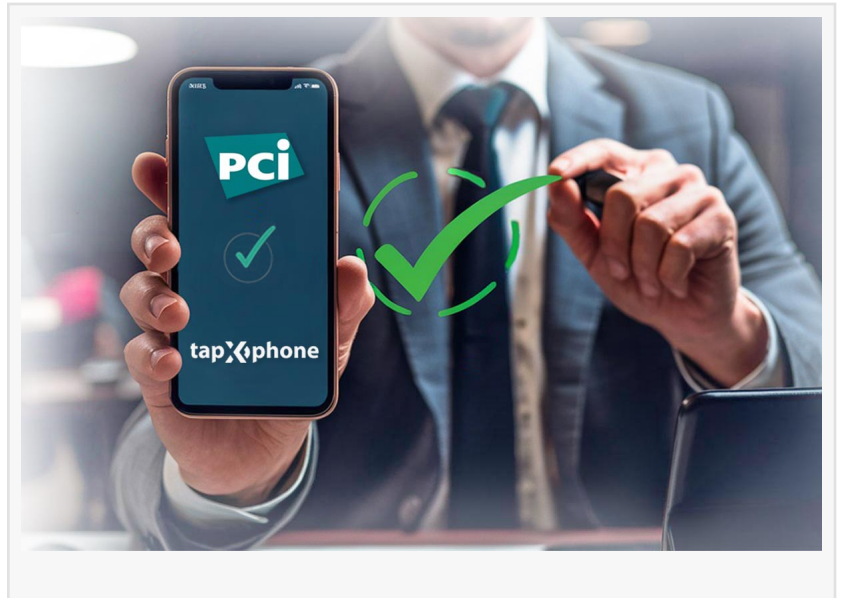

- MPoC Solution Requirements
- MPoC Certification for A&M Services
- MPoC Software Application
- MPoC Isolated SDK

Currently, PCI MPoC is the most advanced standard for payment security on commercial mobile devices. Passing

the first annual compliance checkpoint is much more complex than the initial certification because during the initial certification many processes are just beginning to operate and a number of processes are only declared as existing. As for the subsequent checkpoint, the company must provide tangible evidence of the correct operation of all mechanisms, a strong security system, well-coordinated actions of specialists, and other processes.

Vadzim Smatrayeu, VP Fintech Services at IBA Group, says: "Passing the annual audit confirms

that the processes built into tapXphone are effective, competent, and meet all requirements. We will continue to give special attention to security matters. We will also focus on further development of the functionality to promote wider access to cashless payments around the world."
