Nikhil Agarwal, founder of BPX, describes, "Our new business process management services are designed to support organisations through this transition, so processes are maximised, scalable, and aligned with business objectives for the organisation." Due to our long experience collaborating with customers in twelve various countries, we have developed very deep understanding of problems and solutions unique to our industry."

BPX, being one of the most successful business process reengineering companies, is evolving every day to suit the needs of its clients. The new services unveiled are process diagnostics, designing business process management strategies, workflow automation advice, and change management. These services turn BPX into a full-service partner for any organisation seeking to implement operational excellence.

As Rupal Agarwal, the co-founder of BPX, states, "What sets us apart from other business process management consulting companies is our deep commitment to customisation and co-creation." "Each and every company has its own challenges. The creation and implementation of process solutions that are realistic, scalable, and future-ready is something we undertake in close co-creation with clients."
