Prime determinants of growth

Growth in advancements in technology and increase in globalization are two main significant factors that drive the growth of crime insurance market. Furthermore, rise in complexities of claimed process and surge in evolution of regulation of policy are two main significant restraints hampering the growth of crime insurance market. Moreover, growth in demand for cyber insurance has provided a significant opportunity for the global crime insurance market growth.

The fraud cover segment maintained its leadership status throughout the forecast period

On the basis of coverage segment, the fraud cover segment accounted for the largest market share in the year 2022. The share was found around two-fifths of the crime insurance market revenue and is expected to be the leader in the future. The reason is the high speed of internet connectivity. People have access to high-speed internet connectivity due to which cyber-attacks have increased. In addition, hackers have used their hacking and coding techniques to break the code of any system or window to gain access and are able to change and manipulate the data as per their convenience. However, theft cover segment is expected to grow at a CAGR of 18.5%. This is because of heavy globalization, technological advancement, high-speed internet, and complexity in supply chains.

The business segment to maintain its leadership status throughout the forecast period

On the basis of end user, the business segment held the highest market share in 2022, accounting for more than two-thirds of the crime insurance market revenue and is estimated to maintain its leadership status throughout the forecast period. This is because of the increase in regulatory compliance associated with the protection of sensitive information and financial assets. However, the individual segment is projected to manifest the highest CAGR of 15.6% from 2023 to 2032. This is because of increase in concern for identity theft protection and growth of freelancing, remote work, and home-based business assets as individuals have valuable equipment and intellectual property in their homes that can come under theft situations.

The North America segment to maintain its leadership status throughout the forecast period

North America region accounted for more than one third the crime insurance market revenue and was the major shareholder in the region. There are various reasons for North America segment growth such as high cyber-attacks due to the presence of technology companies in the region. Strict guidelines, large volume of business activities, use of sophisticated financial markets, growing aware of crime insurance and risk management activities, growth in technology innovation, further increased the growth of North America region in the crime insurance market. However, the Asia-Pacific segment is projected to manifest the highest CAGR of 18.6% from 2023 to 2032. This is due to rapid growth in the economy in the region, presence of large population in the region, increase in business activities, trade, and financial transactions in the region.
