

Mechanical Ventilators Market Growth Fueled by Al & Non-Invasive Care to \$4.92B by 2033 | DataM Intelligence

Al-enabled and non-invasive ventilators enhance ICU efficiency and patient care, driving the global mechanical ventilators market to \$4.92B by 2033.

LEANDER, TX, UNITED STATES, October 6, 2025 /EINPresswire.com/ -- In recent years, mechanical ventilators have evolved significantly, enhancing both efficiency and user-friendliness across care settings. A standout development is the incorporation of non-invasive delivery modes such as High-Flow

Mechanical Ventilators Market

Nasal Cannula (HFNC) and High-Flow Oxygen Therapy (HFOT), which offer a more comfortable alternative to intubation. Many modern ventilators now embed HFNC capability alongside traditional Non-Invasive Ventilation (NIV) and invasive options within a single device, enabling healthcare professionals to adapt treatment seamlessly based on patient needs.

Advances in Al-driven, noninvasive, and multifunctional ventilators are transforming critical care, improving outcomes, and reducing clinical workload worldwide."

> Gopinadh Gundreddy | Research Head

• Innovations in closed-loop ventilation systems use AI and advanced algorithms to monitor patients' lung dynamics and adjust ventilator settings, promoting personalised care and reducing manual intervention. These systems also support complex ventilation protocols and offer tools for lung-protective strategies, such as transpulmonary pressure measurement and real-time EtCO and SpO monitoring. These features help clinicians manage the weaning process more effectively, potentially improving patient outcomes in intensive care environments.

According to DataM Intelligence, the global mechanical ventilators market size was valued at US\$3.05 billion in 2024 and is expected to reach US\$4.92 billion by 2033, growing at a CAGR of 5.5% during the forecast period 2025-2033.

Analyst Concludes: Mechanical ventilation advancements are focusing on smarter, patient-centric systems that balance efficiency, safety, and comfort. The integration of HFNC/HFOT with non-invasive and invasive modes in a single device enhances clinical flexibility. Closed-loop ventilation and Al-driven monitoring represent automation and precision in critical care. These innovations reduce clinical workload and optimise patient outcomes through tailored respiratory support. The market is expected to see strong adoption of multifunctional, intelligent ventilators, especially in intensive care and emergency settings.

Recent Developments:

- In May 2025, Medtronic announced the launch of its upgraded Puritan Bennett 980 ventilator system with enhanced artificial intelligence features designed to improve patient-ventilator synchrony and reduce complications in critical care.
- In April 2025, Philips Healthcare expanded its non-invasive ventilation portfolio by introducing a portable ventilator aimed at both hospital and home-care settings. The device was developed to address the increasing burden of COPD and sleep apnea patients requiring flexible respiratory support outside the ICU.

Major Companies:

The major players in the mechanical ventilators market include Medtronic, Philips Healthcare, Hamilton Medical AG, GE Healthcare, Drägerwerk AG & Co. KGaA, Vyaire Medical, Inc., Smith's Medical, ResMed Inc., Fisher & Paykel Healthcare Corporation Limited, Allied Healthcare Products, Inc and among others.

About Us:

DataM Intelligence 4Market Research is a market intelligence platform that gives access to syndicated, customised reports and consulting to its clients in one place. As a firm with rich experience in research and consulting across multiple domains, we are a one-stop solution that will cater to the needs of clients in key business areas. DataM Intelligence has an online platform whose coverage includes industries such as chemicals and materials, agriculture, health care services, animal feed, and food & beverages, among others.

Our platform has Insights on markets that uncover the latest market research data that are distinct from the competition. With coverage across 10 major industries in the marketplace research, dataM Intelligence benefits thousands of companies by helping them take their innovations early to the market, and by providing a complete view of the market with statistical forecasts. Our strategy-centric framework and value-added services will let individuals and corporates with ease of access and custom personalisation to research and markets.
