About the Book

Leanne Hermes, the wife of an eccentric billionaire scientist, is suddenly transported 99 years into the past by a device her husband designed to harness the energy of the female orgasm. Stranded in an era where women have no rights and modern comforts are nonexistent, Leanne must navigate the rigid constraints of Edwardian society armed only with her intelligence and determination.

Meanwhile, in the present, her devastated husband believes his invention has killed her—until he discovers mysterious journals left by his great-grandfather that hold startling clues. What unfolds is a web of family secrets, scientific obsession, and passion that transcends time.
