Created with strategic planning, process discovery, and RPA provider automation roadmap creation in view, the

comprehensive new suite consists of expert RPA consulting services. BPX will leverage its extensive knowledge as a robotic process automation services company to offer advanced implementation and integration services as well. BPX is also happy to offer professional counsel as a [Business Process Xperts](#), assisting RPA companies in getting the best out of their UiPath investments and capabilities. BPX has a concentrated focus on industry-leading platforms.

"The digital transformation process is ongoing and even automation specialists require strategic partners to assist," stated Nikhil Agarwal, Business Process Xperts' Founder. "Drawing on years of process optimization and automation experience, our new offerings are now in particular aimed at empowering RPA companies to achieve their true potential. Our aim is to act as the catalyst and allow them to deliver their clients increasingly impactful automated solutions."

Business Process Xperts Co-founder Rupal Agarwal stated, "We have seen a definite need in the RPA environment for niche support beyond wide-ranging IT consulting. Our focused approach ensures that RPA companies are able to get the most out of their go-to-market strategies, streamline their own operations, and ultimately accelerate the digital transformation journeys of their customers. Collaborating with these innovative businesses thrills us because it will drive mutual success."

BPX's new offerings will address key domains such as internal process optimization for RPA vendors, streamlining their own supply chains, sales processes, and business workflows. The offerings also involve enhanced solution design and architecture, expert guidance on building robust, scalable, and future-proof RPA solutions. BPX also focuses on human development and training, providing tailored assistance and upskilling for RPA vendor teams in navigating tough automation projects. Last but not least, post-deployment support and optimization ensure ongoing efficiency and ongoing improvement of automated systems within RPA companies and for their customers.
