ANY.RUN has added new integrations with □□□ □□□□□□, □□□□ □□□□ □□□□□□□□ □□□□□□ □□□□□, □□□□□□□□□□ □□□□□□□□, □□□ □□□□□□□□□□ □□□□□□□□, enabling SOC teams to automate enrichment and access live threat intelligence directly within their existing workflows.

Key benefits for organizations include:

· □□□□□ □□□□□□ □□□□□□□□□: Identify attacks earlier in the kill chain with live IOCs from sandbox detonations, reducing breach risk by up to 42%.

· □□□□□□ □□□□□□ □□□ □□□□□□□□: Automated enrichment shortens investigation time by an average of 21 minutes per incident.

· □□□□□□□ □□□□□ □□□□□□□: With nearly 100% verified malicious IOCs, analysts spend less time reviewing false positives.

· □□□□□□ □□□ □□□□□□□□□□: Routine tasks are automated, enabling up to 3× productivity improvements.

The redesigned Threat Intelligence Lookup now offers a faster and more intuitive workflow, helping analysts of all levels access actionable data with fewer steps. With a cleaner interface, improved navigation, and built-in learning resources, teams can enrich indicators, explore current attack trends, and uncover relevant threats in seconds, all from a single, unified dashboard.

In September, ANY.RUN expanded its detection capabilities across every layer of the threat landscape, adding 99 new behavior signatures, 11 YARA rules, and over 2,300 Suricata rules. These updates improve visibility across ransomware, stealers, loaders, phishing, and network-based attacks, helping SOC teams identify complex, evasive threats earlier, accelerate containment, and reduce overall risk exposure.

ANY.RUN supports over 15,000 organizations worldwide across industries like banking, healthcare, telecom, manufacturing, and retail. Its cloud-based Interactive Sandbox enables teams to safely analyze threats targeting Windows, Linux, and Android systems in under 60 seconds. Together with Threat Intelligence Lookup and Threat Intelligence Feeds, ANY.RUN empowers SOC teams to improve detection accuracy, streamline workflows, and build more resilient cybersecurity operations.
