

Usetech Returns to GITEX GLOBAL 2025 to Showcase Cutting-Edge Digital Solutions

DUBAI, DUBAI, UNITED ARAB EMIRATES, October 7, 2025 /EINPresswire.com/ -- Usetech, a leading provider of advanced digital solutions, will participate in GITEX GLOBAL 2025 for the third consecutive time, highlighting its latest innovations designed to drive digital transformation across industries. The event, one of the Middle East's largest technology gatherings, will take place from October 13–17, 2025 in the UAE, bringing together global technology leaders, startups, and innovators.

At GITEX GLOBAL 2025, Usetech will present a portfolio of solutions aimed at accelerating digital transformation in manufacturing, energy, oil & gas, finance, and other sectors. Visitors will have the opportunity to engage directly with Usetech's team and solution architects, explore products at interactive demo stands, discuss implementation strategies, arrange pilot programs, and receive tailored recommendations for their business needs.

Key solutions to be showcased include:

Octopus — a universal AI platform for transparent management and optimization of IT resources across private data centers and cloud environments.

USEBUS AI-Code — a next-generation integration management platform ensuring secure, continuous data delivery between IT systems.

USETWIN — an intelligent platform for quantitative analysis and risk management of complex production systems across core and auxiliary business processes.

USECORE — an AI-powered geologist's assistant automating the core sample recognition process.

Teal HR — an analytics-driven employee motivation and engagement platform featuring adaptive incentive mechanisms.

Specialized vibration monitoring and analytics solutions for oil and gas exploration, leveraging microseismic data.

Usetech's third appearance at GITEX reflects its long-term strategy to strengthen its global

technology presence, expand into the Middle Eastern market, and signal its readiness for international partnerships and large-scale deployments.
