

# 26.2% CAGR : Workflow Management Systems Market to Grow from USD 9.8 Billion in 2022 to USD 99.9 Billion by 2032

WILMINGTON, NEW CASTLE, DE, UNITED STATES, October 7, 2025 /EINPresswire.com/ -- Allied Market Research published a report, titled, "[Workflow Management Systems Market](#) by Component (Software and Services), Enterprise Size (Large Enterprises and Small and Medium-sized Enterprises), Deployment Mode (On-premise and Cloud), and Industry (BFSI, Retail, Education, IT and Telecom, Healthcare, Transportation, and Others): Global Opportunity Analysis and Industry Forecast, 2022–2032".

According to the report, the workflow management system industry generated \$9.8 billion in 2022 and is anticipated to generate \$99.9 billion by 2032, witnessing a CAGR of 26.2% from 2023 to 2032.

## Prime Determinants of Growth

The notable factors positively affecting the workflow management systems market include rise in adoption of advanced technologies across several industries and the rise of remote and distributed workforces. However, high implementation costs associated with workflow management systems and complexities in integrating workflow management systems with existing systems can hinder market growth. However, rise in the implementation of cloud-based technologies offers lucrative market opportunities for the market players.

The software store segment to maintain its leadership status throughout the forecast period

Based on component, the software segment held the highest market share in 2022, accounting for more than two-thirds of the workflow management systems market revenue, and is

estimated to maintain its leadership status throughout the forecast period. This is attributed to the growing need for a high level of personalization, as it is one of the primary reasons enterprises are increasing their investment in the workflow management systems market. However, the services segment is projected to witness the highest CAGR of 28.0% from 2023 to 2032, the services segment is expected to witness the highest growth, as these services help to reduce the time and costs associated with optimizing systems in the initial phase of deployment.

The large enterprises segment to maintain its lead position during the forecast period

Based on enterprise size, the large enterprises segment accounted for the largest share in 2022, contributing to more than two-thirds of the Workflow Management Systems Market revenue, owing to the growing demand for workflow management system solutions in large enterprises. However, the small and medium-sized enterprises segment is expected to portray the largest CAGR of 28.7% from 2023 to 2032 and is projected to maintain its lead position during the forecast period. It provides various benefits to the small and medium-sized enterprises organization.

The cloud segment to maintain its lead position during the forecast period

Based on deployment mode, the cloud segment accounted for the largest share in 2022, contributing to more than three-fifths of the workflow management systems market revenue and it is projected to maintain its lead position during the forecast period. This is attributed to an increase in the need for secure and reliable data within the organization is fueling the market growth. It provides several advantages such as reducing costs, supporting business, and effectively controlling the business environment in the organization.
