A student loan is given to pay for the borrower's enrollment at a higher education institution or a vocational school that is secured by and on which the payment of the outstanding principal and interest has been deferred under the insurance or guarantee of the federal government, a state government, or any agency of either. In addition, rise in costs of education and increase in demand for extra educational courses along with the degree are the major factors driving the growth of the market. However, prolonged repayment periods hamper the growth of the market. Moreover, increase in initiatives by governments in developing countries on student loans to provide education to the citizens is anticipated to provide lucrative opportunities for the market growth. Thus, these are the major student loan market trends.

Drivers Importance for higher education along with additional courses in corporate sector
The lower interest rates on student loans
No credit checks for the loan applications
Subsidized interests offered by the lenders

Opportunities Growth in the middle-class segment, rapid urbanization, and rise in literacy level in developing countries

Restraints Longer repayment period
Risk on credit report after defaulting

The research provides detailed segmentation of the global student loan market based on type,

repayment plan, age group, end user, and region. The report discusses segments and their sub-segments in detail with the help of tables and figures. Market players and investors can strategize according to the highest revenue-generating and fastest-growing segments mentioned in the report.

Based on type, the federal/government loan segment held the highest share in 2021, accounting for more than four-fifths of the global student loan market, and is expected to continue its leadership status during the forecast period. However, the private loan segment is expected to register the highest CAGR of 11.9% from 2022 to 2031.
