

Dragonfile Launches DragonfileONE, Bringing Enterprise-Grade Claims Management Software to Solo Adjusters

DragonfileONE empowers independent adjusters with simplified claims management software designed to streamline workflow and reduce admin time.

LAKE MARY, FL, UNITED STATES, October 8, 2025 /EINPresswire.com/ -- Dragonfile, a leader in [claims management software](#) built specifically for [adjusters](#), have announced the launch of [DragonfileONE](#), a powerful, streamlined platform designed exclusively for independent and solo adjusters handling flood and P&C claims.

The image shows a promotional graphic for DragonfileONE. On the left, the Dragonfile logo (a stylized dragon) is above the text "dragonfile CLAIMS MANAGEMENT SOFTWARE". Below this, it says "Dragonfile FOR IA FIRMS & ADJUSTING TEAMS" and "DragonfileONE FOR SOLO ADJUSTERS". A quote reads: "Join thousands of adjusters who trust Dragonfile to streamline, simplify, and scale their claims management workflow." On the right, a laptop and a smartphone display the software interface. The laptop screen shows a dashboard with a welcome message "Welcome Back, Matt Damon", three large blue boxes with numbers "10", "57", and "22", and a list of tasks. The smartphone shows a similar interface. At the bottom right, the slogan "Adjust More. Admin Less." is written in white on a blue background.

Dragonfile gives adjusters of all sizes the tools to streamline claims management, with DragonfileONE built specifically for solo and independent adjusters.

DragonfileONE builds on the trusted capabilities of Dragonfile, delivering a streamlined solution tailored for the solo adjuster. It provides independent professionals with access to the same secure file handling, workflow automation, and carrier-ready submissions trusted by established adjustment firms, without unnecessary complexity or overhead.

“

Dragonfile was created from the ground up to be the claims management software adjusters actually need: affordable, easy to use, and free of clunky, unused features or awkward workarounds.”

William Piacenti

“As an adjuster for over 25 years, I have lived the challenges of managing claims without the right tools,” said William Piacenti, Founder and CEO of Dragonfile. “Dragonfile was created from the ground up to be the claims management software adjusters actually need: affordable, easy to use, and free of clunky, unused features or awkward workarounds. With DragonfileONE, we identified a growing need for independent and solo

adjusters to leverage the same power and efficiency larger firms enjoy, but in a package built for

one. This is the next step in giving every adjuster, no matter their size, the ability to work smarter, stay organized, and deliver exceptional files to carriers and TPAs.”

Unlike traditional platforms designed for carriers or large organizations, DragonfileONE was built specifically for the solo adjuster market. It enables solo adjusters to:

- Stay focused on what matters most by using a centralized dashboard that highlights claim status, deadlines, and missing documents
- Save time and reduce errors with built-in workflow automation and preloaded checklists
- Eliminate digital clutter by organizing all files, notes, and documents in a single system
- Submit professional, carrier-ready files through secure sharing without needing extra software

DragonfileONE ensures independent and solo adjusters can streamline their workflows without sacrificing professionalism or accuracy, providing the same advantages once reserved for larger adjustment firms. For more information, visit dragonfile.io.

About Dragonfile

Dragonfile is a cloud-based claims management software platform developed by industry veterans who understand the real-world workflows of independent adjusters. Whether managing flood or P&C claims, solo adjusters and adjustment firms rely on Dragonfile to reduce cycle times, simplify submissions, and deliver organized, carrier-ready files effortlessly.
