

DefEYE, Inc. and Lovell Partner to Bring BIOVANCE Portfolio to Federal Healthcare Systems

Partnership expands federal access to BIOVANCE ocular portfolio, improving eye care for veterans and military patients.

PENSACOLA, FL, UNITED STATES, October 9, 2025 /EINPresswire.com/ -- Lovell® Government Services (Lovell) and DefEYE, Inc. (DefEYE), an exclusive provider of BIOVANCE® decellularized basement membranes for ocular use, announced today that they have partnered to serve federal healthcare systems including the Veterans Health Administration, the Department of Defense Military Health System, and the Indian Health Service. Lovell will serve as DefEYE's Service-Disabled Veteran-Owned Small Business (SDVOSB) vendor to serve these customers through federal contracting systems.

“

Lovell Government Services is proud to partner with DefEYE to bring its ophthalmic-biologic products to federal healthcare providers.”

Chris Lovell, CEO of Lovell Government Services.

“Lovell Government Services is proud to partner with DefEYE to bring its ophthalmic-biologic products to federal healthcare providers,” said Chris Lovell, Major, USMC (Ret.), CEO of Lovell Government Services. “By making DefEYE’s BIOVANCE ocular portfolio available through our contract vehicles, we streamline practitioner and hospital acquisition, help agencies meet SDVOSB goals, and most importantly expand access to eye care innovations that help preserve and restore vision for the veterans we serve.”

DefEYE’s BIOVANCE 3L Ocular and BIOVANCE are the only decellularized basement membranes used to elevate the management of ocular surface disease and ocular surgery. In particular, Biovance 3L Ocular possesses a tri-layer architecture with a preserved natural epithelial basement membrane and intact extracellular matrix structure. The unique design

simultaneously adheres to the ocular surface and facilitates cellular migration supporting natural ocular surface healing. BIOVANCE products are uniquely available in six shapes and sizes, all ring-free and bidirectional to provide patient comfort and application flexibility.

Aseptically processed and terminal sterilized, BIOVANCE products are also shelf stable at room temperature.

“We are proud to partner with Lovell to expand treatment options for military service members and veterans with our BIOVANCE ocular portfolio of decellularized basement membranes,” said Rob Sambursky, MD, CEO of DefEYE, Inc. “Ocular surface disease is a common condition that causes significant discomfort and visual impairment among those who have served our country. BIOVANCE offers physicians an innovative option for both in-office and surgical use. By combining a biologic scaffold for cellular migration with active signaling proteins, our decellularized basement membranes deliver a more effective, clinically meaningful solution for managing ocular surface disease.”

About DefEYE, Inc.

DefEYE, Inc. is a rapidly growing ocular company on a mission to transform and personalize therapeutic approaches in eye care. The company focuses on delivering a portfolio of innovative decellularized biologic solutions that optimize treatment and management of various eye care conditions, including ocular surface diseases, pterygium surgery, and other surgical interventions.
