

Raiiz Partners with Surgically Clean Air® to Enhance Healthy & Sustainable Homes with Commercial-Grade Air Purification

Raiiz now offers Surgically Clean Air's commercial-grade purifiers, setting a new standard for health in sustainable and high-performance home building.

VANCOUVER, BRITISH COLUMBIA, CANADA, October 8, 2025 /EINPresswire.com/ -- Raiiz Innovations Inc., a leader in sustainable building solutions, announces a new distribution agreement with Surgically Clean Air®, a leading provider of advanced air purification systems. This partnership will integrate Surgically Clean Air's commercial-grade technology into Raiiz's portfolio, offering builders and homeowners a seamless way to incorporate superior indoor air quality into their projects.

“

A truly green home needs clean air. To combat threats like wildfire smoke and VOCs, we partnered with the established leader, Surgically Clean Air, to provide a proactive solution for healthier living”

Robert J. Pierson - CEO - Raiiz Innovations Inc

The partnership comes at a time when the demand for truly healthy homes is on the rise. While sustainable building often focuses on energy efficiency and eco-friendly materials, indoor air quality is an equally vital and often overlooked element of a home's health.

“This agreement with Surgically Clean Air is a significant step forward in our mission to redefine sustainable living,” said Robert J. Pierson, CEO at Raiiz Innovations Inc. “A truly green home is one that promotes occupant well-being, and that starts with the air they breathe. Facing a new reality of wildfire smoke, rising asthma rates, and other airborne threats, we knew a proactive solution was essential.

Partnering with an established leader like Surgically Clean Air was a natural choice, as their proven technology perfectly complements our commitment to providing innovative, science-backed solutions for the modern builder and homeowner."

KEY HIGHLIGHTS OF THE PARTNERSHIP:

Integrated Solutions: Raiiz Innovations will now distribute Surgically Clean Air's advanced purification systems, including their signature JADE®2.0, COBALT® 2'x2', COBALT® 2'x4' and ONYX SCA® air purification systems, to its network of builders, designers, and homeowners.

Focus on Health and Sustainability:

Both companies share a core value in creating healthier environments. The partnership addresses airborne

pollutants, volatile organic compounds (VOCs), and other contaminants that can be released during construction, renovation and daily living. By integrating air purification systems from Surgically Clean Air®, these contaminants can be effectively reduced, capturing greater than 99.9% of airborne particles as small as 0.1 microns.

A Natural Fit: Surgically Clean Air's reputation for commercial-grade performance and commitment to clean air aligns seamlessly with Raiiz's dedication to quality, health, and environmental responsibility in sustainable construction.

"There is a great deal of synergy in this partnership as both Surgically Clean Air and Ecohome advocate for building practices that elevate indoor wellness," states Dave Lax, CRO of Surgically Clean Air®.

This collaboration reinforces Raiiz's position as a one-stop-shop for high-performance, [sustainable building materials and technologies via their Ecohome website](#). By providing access to Surgically Clean Air's purification solutions, Raiiz is empowering its customers to build homes that are not only environmentally sound but also fundamentally healthier for the people who live in them.
