

TrueSecure™ Launches Six New Wi-Fi Direct Smart Locks Powered by KoreLock® Technology

TrueSecure WP Wi-Fi Direct Smart Locks offer secure, keyless access at half the cost of wired locks, operating on existing networks with no new wiring.

DENVER, CO, UNITED STATES, October 13, 2025 /EINPresswire.com/ -- [KoreLock](#) and [Levata](#) are excited to introduce the new [TrueSecure™](#) WP Series, a lineup of six Wi-Fi Direct Smart Locks powered by KoreLock®, delivering commercial-grade access control without the cost and complexity of traditional wired systems.

Engineered and assembled in the USA, the TrueSecure WP Series provides secure, keyless access at up to 50% lower cost than conventional wired access control solutions. These commercial Smart Locks install quickly, reduce hardware and labor expenses, and bring innovative access management to virtually any door — exterior, interior, or exit.

“Our partnership with KoreLock allows us to bring powerful, connected access control to more businesses at a fraction of the cost,” said Kyle Henning, Vice President of Emerging Capabilities at Levata, the parent company of the TrueSecure door lock brands. “The TrueSecure WP Series of Wi-Fi Direct locks is redefining how organizations deploy secure, remote access without the need for rewiring their buildings.”

The TrueSecure WP Series of Wi-Fi Direct Smart Locks includes six new models: Deadbolt, Grade 2 Lever, Grade 1 Lever, Exit Trim, and Interconnected models, all compatible with most commercial door lock applications.

DESIGNED FOR SIMPLICITY, BUILT FOR SAVINGS

With TrueSecure's streamlined installation and KoreLock's turnkey wireless IoT technology platform, businesses can modernize their access control systems without major retrofits, new wiring, or network infrastructure upgrades. The TrueSecure WP Series of Wi-Fi Direct Smart Locks includes six new models:

Deadbolt, Grade 2 Lever, Grade 1 Lever, Exit Trim, and Interconnected models, all of which are compatible with most commercial door lock applications.

The TrueSecure WP Series of Wi-Fi Direct locks are powered by KoreLock® Inside.

UNLIMITED MOBILE CREDENTIALS AND REMOTE MANAGEMENT

The TrueSecure WP Series of Wi-Fi Direct locks is redefining how organizations deploy secure, remote access without the need for rewiring their buildings."

*Kyle Henning, Vice President
of Emerging Capabilities at
Levata.*

Powered by KoreLock's integrated IoT Smart Lock technology platform, TrueSecure WP Smart Locks feature BLE and Wi-Fi direct connectivity that operates securely over existing networks. Mobile credentials can be issued or revoked instantly from anywhere, providing unmatched flexibility for property managers, building administrators, and end-users.

COMMERCIAL SECURITY THAT DRIVES GROWTH

For dealers, distributors, and integrators, TrueSecure WP Smart Locks open new opportunities to deliver scalable, connected security at accessible price points.

"TrueSecure WP Smart Locks represent a powerful combination of innovation and practicality," added Rob Goff, VP of Product and Co-Founder of KoreLock. "They make it easy for partners to increase profitability while providing customers with a secure, future-ready solution."

NOW AVAILABLE FOR PURCHASE

The TrueSecure WP Smart Lock Series brochure, which includes the complete specifications of the six Smart Locks offered, is now available for download at www.tinyurl.com/truesecure-wp-series-brochure for interested parties.
