

Frontier AURIA to drive the next generation of SmartRadio devices

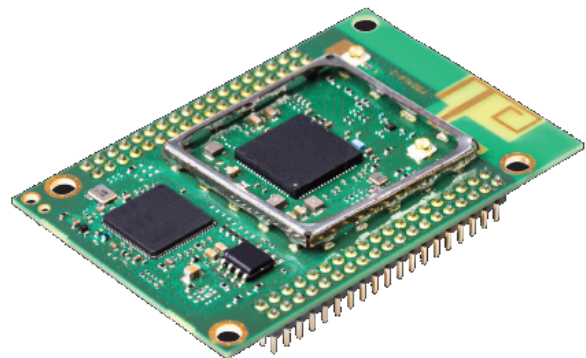

Frontier AURIA has new features and is ready for the next generation of SmartRadios

CAMBRIDGE, UNITED KINGDOM,
October 9, 2025 /EINPresswire.com/ --
Frontier has launched the latest
software version for their AURIA
turnkey module, Connected Audio (CA)
1.2, which adds software features to
allow brands to create the next
generation of SmartRadio devices with
game changing features.

CA 1.2 includes...

- Support for **1000000, 1000000-1000000**. Show now playing album art and metadata to the user on large, stand out displays
- Offer the latest **10000000 10000000** version with support for Spotify Lossless
- Apple's latest version of **10000000** with **1000000000** feature
- Support for **1000+** and **100** with Frontier's flagship Kino4 chip added to AURIA.
- **100000000 1000000** and **1000000000** service with over 80k radio stations and over 100k podcast series
- **100000** with **1000000-1000000** and **100000** functionality
- **1000000 1000000** menu to allow users to easily access any source from one menu
- **10000 100000** and control with OKTIV via Bluetooth LE, allowing setup with a few steps
- **10000000000® 100 100000** and classic dual mode
- **1000000000** broadcaster and receiver to allow audio sharing with multiple devices

A range of SmartRadio products are in development and will be launched to market in 2026.

Reliable products can be easily and rapidly created with the AURIA turnkey solution, which is certified and available in a reference speaker product. For advanced products, a range of architecture and custom developments can be supported with Frontier's ConnectedAudioKit package of tools and documentation.

Frontier will be showing a demo of AURIA with CA 1.2 during the HongKong Electronics fair between the 13th and 16th October. Please contact sales@frontiersmart.com to learn more and to book a meeting.
