

Polaris Vein & Aesthetics Enhances Patient Wellness with Body Sculpting and Emsella Technology

Polaris Vein & Aesthetics helps patients look leaner, feel stronger, and move with confidence through personalized Body Sculpting and Emsella treatments.

COLUMBUS, OH, UNITED STATES, October 20, 2025 /EINPresswire.com/ -- At [Polaris](#) Vein & Aesthetics, patients can now strengthen their bodies from the inside out while achieving the contours they've always wanted. Through a powerful combination of [Body Sculpting](#) treatments and the innovative [Emsella](#) chair, Polaris offers both aesthetic and functional transformation. These noninvasive, zero-downtime treatments help patients look leaner, feel stronger, and move through daily life with renewed confidence.

The team at Polaris Vein & Aesthetics is dedicated to helping every patient feel stronger, healthier, and more confident — providing expert care and support at every step of the journey.

“True wellness is about more than appearance, it’s about strength, function, and how people feel in their own skin,” said Dr. Cooper, founder of Polaris Vein & Aesthetics. “By combining Body Sculpting and Emsella, we are able to address both sides of the equation, giving patients results they can see and benefits they can feel.”

“

True wellness is about more than appearance, it’s about strength, function, and how people feel in their own skin.”

Dr. Amanda Cooper

Body Sculpting: Your Ideal Contours, Your Way

Even with regular exercise and a healthy diet, it can be hard to achieve the toned physique many patients are

working toward. Polaris offers customized Body Sculpting treatments using advanced devices like Exion, Emsculpt NEO, and Physiq. This variety of modalities allows the team to tailor each

plan to individual goals.

Noninvasive and Comfortable: No needles, no downtime, and treatments safe for all skin types.

Quick and Customizable: Sessions fit easily into a busy schedule, and treatment plans are tailored to each patient.

Visible Results: Initial results are often seen within 1 to 2 months, with long-lasting improvements when paired with maintenance.

By using muscle stimulation combined with gentle heat, Body Sculpting not only reduces unwanted fat but also helps tone and strengthen targeted muscles. It's a way to address the areas resistant to diet and exercise while creating a leaner, more defined look.

The Polaris Vein & Aesthetics team — united in their mission to help patients feel confident, healthy, and empowered every day.

Emsella: Strengthen Your Core From Within

While Body Sculpting focuses on reshaping the outside, the Emsella chair builds strength where it matters most: the pelvic floor. Using high-intensity focused electromagnetic (HIFEM) technology, Emsella stimulates thousands of deep pelvic floor contractions in a single session—something impossible to achieve with traditional exercise alone.

Restored Strength: Patients begin to notice improvements within about 2 weeks.

No Downtime: Treatments are noninvasive, quick, and performed fully clothed.

Lasting Benefits: With periodic maintenance, results can be permanent.

Emsella helps improve bladder control, reduce urinary incontinence, and strengthen core support, all of which have a direct impact on daily comfort and confidence.

The Power of Combining Treatments

Together, Body Sculpting and Emsella create a comprehensive transformation. Patients not only see a leaner, more toned physique but also feel stronger and more supported from the inside out. Improved posture, muscle tone, and pelvic floor health enhance both physical wellness and overall confidence, helping patients live more active, comfortable, and empowered lives.

Why Patients Trust Polaris

Polaris Vein & Aesthetics is Columbus's premier destination for vein care, aesthetics, and wellness, committed to helping patients achieve lasting improvements in both health and appearance. Patients choose Polaris for Body Sculpting and Emsella because of the clinic's advanced technology, fully customized treatment plans, and compassionate, patient-first approach. Founded by Dr. Cooper, Polaris is dedicated to delivering safe and effective care that makes patients stronger, healthier, and more confident every day.
