

# TruckersFinder Becomes a CBP Qualified Party — Helping Businesses Navigate the End of the De Minimis Exemption

*TruckersFinder joins CBP's elite list of Qualified Parties, helping global shippers stay compliant after the end of the U.S. de minimis exemption.*

HOUSTON, TX, UNITED STATES, October 10, 2025 /EINPresswire.com/ -- On August 2025, a major shift took place in global e-commerce and logistics: the U.S. government officially ended the long-standing de minimis duty exemption that allowed goods valued under \$800 USD to enter the country without paying duties or taxes.

For years, this rule simplified cross-border commerce for online retailers, couriers, and postal operators worldwide. But it also opened loopholes that made it difficult for U.S. Customs and Border Protection (CBP) to track the true volume and value of imported goods.

When the exemption was lifted, more than 1.4 billion packages per year suddenly required formal entry and duty payment — a seismic change that left many postal authorities and logistics networks searching for compliant, scalable solutions.

## What Does It Mean for Global Shippers?

Without the de minimis exemption, every shipment — no matter how small — must be classified, valued, and assessed for duties before it crosses the U.S. border.

That means:

- E-commerce platforms must accurately calculate duties at checkout.
- Postal operators and couriers must transmit complete data before arrival.

- Importers and brokers must ensure compliance with CBP regulations.

Failure to meet these new requirements can lead to clearance delays, penalties, and strained customer experiences.

### [TruckersFinder](#) Is Now a CBP Qualified Party

We're proud to announce that TruckersFinder has been officially approved as a [U.S. CBP Qualified Party](#) — one of only 25 organizations worldwide authorized to manage de minimis duty payments on behalf of importers, couriers, and postal operators.

As a Qualified Party, TruckersFinder has the authority to:

- Classify products using accurate Harmonized Tariff codes.
- Calculate and collect duties before shipment.
- Remit payments directly to CBP, ensuring smooth clearance.
- Provide a Declaration ID that validates every transaction for transparency and traceability.

### Introducing [TariffGenie](#) — Compliance at the Speed of Commerce

To power this new era of compliance, TruckersFinder developed TariffGenie, our intelligent duty-automation platform.

TariffGenie integrates directly with e-commerce systems, customs brokers, and postal APIs to: Automatically classify goods by HTS code. Compute applicable U.S. duties and taxes in real time. Generate a Declaration ID as proof of pre-payment. Provide an API-ready compliance layer for couriers and marketplaces.

With TariffGenie, international sellers and logistics providers can keep their parcels moving while staying fully compliant with CBP regulations.

### Why It Matters

This change isn't just about compliance — it's about modernizing global trade. The end of the de minimis era marks the start of smarter, data-driven import processes.

By partnering with TruckersFinder, postal agencies, freight forwarders, and e-commerce platforms can:

- Avoid costly clearance delays.
- Maintain consumer trust with transparent duty pricing.
- Simplify the complex world of U.S. import compliance.

### The Future of Cross-Border Commerce

As trade continues to globalize, technology-driven compliance will define success for international logistics. TruckersFinder is proud to lead this transformation — bridging the gap between global e-commerce and U.S. customs regulations through automation, data accuracy, and trust.

If your organization handles shipments to the U.S., now is the time to ensure your compliance process is future-ready.
