Ipatasertib Global Market Report 2025 –
Market Size, Trends, And Forecast 2025-
2034*

LONDON, GREATER LONDON, UNITED
KINGDOM, October 13, 2025

/EINPresswire.com/ -- How Large Will

[The Ipatasertib Market Be By 2025?](#)

In the past few years, the market size of ipatasertib has seen a brisk expansion. The anticipated increase is from \$0.76 billion in 2024 to \$0.86 billion in 2025, demonstrating a compound annual growth rate (CAGR) of 13.6%. This substantial growth from the historical period can be associated with factors such as the escalating global incidence of cancer, a higher number of

prostate cancer cases, the rise in clinical tests, increased financial backing for cancer research and development, and a favoritism towards personalized medical care.

The size of the ipatasertib market is predicted to expand significantly in the upcoming years, reaching an estimated \$1.42 billion in 2029 with a compound annual growth rate (CAGR) of 13.2%. The anticipated growth during the forecast period can be attributed to factors such as increasing implementation of beneficial government policies, a heightened demand for immunomodulatory

treatments, a rising inclination towards precision medicine, escalated investments in healthcare services, and increasing healthcare expenditures. Key trends projected during this forecast period include progress in targeted therapy, advancements in pharmaceutical and biotechnological research, incorporation of computational biology technologies, and the emergence of new therapeutic applications for ipatasertib.

What Are The Major Driving Forces Influencing [The Ipatasertib Market Landscape?](#)

The Business
Research Company

The Business Research Company

The augmentation in cancer rates is predicted to stimulate the growth of the ipatasertib market. Cancer, a variety of diseases typified by unregulated growth and dissemination of abnormal bodily cells, has seen rising prevalence owing to lifestyle choices such as poor dietary habits, lack of physical activity, smoking, and excessive alcohol consumption. Ipatasertib helps improve cancer therapy approaches by targeting the PI3K/AKT signaling pathway, effectively slowing tumor growth and expansion. It decreases cancer cell survivability and resistance to therapy, thereby enhancing treatment results and patient prognosis. For instance, the National Health Service reported in October 2024, that the number of fresh cancer diagnoses in the UK increased by 5%, from 329,664 in 2021 to 346,217 in 2022, averaging 948 cases daily. Hence, the upsurge in cancer prevalence propels the ipatasertib market growth. The elevation in preference for personalized medicine is anticipated to boost the ipatasertib market growth. Personalized medicine, a medical model that uses a person's unique genetic composition, lifestyle, and environment to determine prevention and treatment strategies, is becoming increasingly popular due to advancements in genomics, making precise identification of genetic modifications and individual-specific treatments possible. Ipatasertib bolsters personalized medicine by targeting the PI3K/AKT signaling pathway, enabling specific cancer treatment based on individual tumor profiles. It ameliorates therapeutic efficacy by addressing unique genetic and molecular traits, mitigating treatment resistance, and optimizing patient outcomes. For example, in February 2024, the Personalized Medicine Coalition reported that the U.S. FDA approved 26 new personalized medications in 2023, a substantial increment from the 12 approved in 2022. Hence, the growing preference for personalized medicine positively impacts ipatasertib market growth.

Who Are The Top Players In The Ipatasertib Market?

Major players in the Ipatasertib Global Market Report 2025 include:

- F. Hoffmann-La Roche AG
- Abcam plc
- Cayman Chemical Company Inc.
- Selleck Chemicals LLC
- ChemScene LLC
- Creative Biolabs Inc.
- TargetMol Chemicals Inc.
- MedChemExpress LLC
- BOC Sciences Inc.
- Adooq Bioscience LLC

Market Share And Forecast By Segment In The Global Ipatasertib Market

The ipatasertib market covered in this report is segmented as

- 1) By Indication: Prostate Cancer, Breast Cancer, Other Cancers
- 2) By Dosage Form: Tablets, Capsules, Other Dosages
- 3) By Route Of Administration: Oral, Intravenous
- 4) By Distribution Channel: Hospital Pharmacies, Retail Pharmacies, Online Pharmacies

Subsegments:

- 1) By Prostate Cancer: Metastatic Castration-Resistant Prostate Cancer (mCRPC), Metastatic Hormone-Sensitive Prostate Cancer (mHSPC), Non-Metastatic Prostate Cancer
- 2) By Breast Cancer: Triple-Negative Breast Cancer (TNBC), Hormone Receptor-Positive Or Human Epidermal Growth Factor Receptor 2 (HER2)-Negative Breast Cancer, Human Epidermal Growth Factor Receptor 2 (HER2)-Positive Breast Cancer
- 3) By Other Cancers: Ovarian Cancer, Gastric Cancer, Pancreatic Cancer, Colorectal Cancer, Lung Cancer
