The global shooting ranges market is growing at a CAGR of 8.3% from the forecast period 2022 to 2031 growth of practice and study of firearms, frequently for archery. The shooting ranges are appropriate for this criterion due to their aim to offer a protected environment for weapons training. The rising need for live fire drills and the production of the latest sophisticated firearms is driving the growth of the market. Moreover, by type, the indoor shooting range dominated the market in 2021, in terms of revenue, and is expected to lead the market throughout the forecast period. By product type, the fixed targets segment incurs a higher share. By end-user, the military segment dominates the market in 2021, in terms of revenue. At present, North America is the highest revenue contributor, followed by Asia-Pacific.

Shooting ranges are regulated environments created for the instruction and testing of weapons, as well as occasionally for archery. It might be virtual, indoor, or both, and it might be on the outskirts of a city or close to a forest. Shooting ranges also feature extras like the firing point, targets, backstop, wind flags, and lights. Shooting ranges are increasingly used as a form of recreation despite typically being built for use by the military and law enforcement. These are secure, eco-friendly locations that can also be utilized to test guns.

Shooting ranges can be indoor or outdoor, may only permit the use of specific firearms, such as pistols or long guns, or they may focus on specific Olympic sports, such as trap/skeet shooting or 10 m air pistol/rifle. Most indoor ranges forbid the use of rifles, fully automatic weapons, or high-powered calibers.
