

# Mentalyc's Group Practice Feature Empowers Small Therapy Clinics with Enterprise-Level AI Tools

*Mentalyc unveils new Group Practice pricing, giving small therapy clinics affordable AI tools to manage teams, scale operations, and stay compliant.*

SAN FRANCISCO, CA, UNITED STATES, October 10, 2025 /EINPresswire.com/ --

In a world where therapists are drowning in paperwork, small and mid-sized practices are finally catching a break. [Mentalyc, the AI medical scribe](#)

purpose-built for therapists, has

announced the launch of its new Team Plan, empowering group practices to deliver greater value to their clinicians and clients with cost-effective pricing.

“

Our goal is to make powerful AI tools accessible to every therapy team, helping small clinics grow efficiently while keeping therapy personal and compliant”

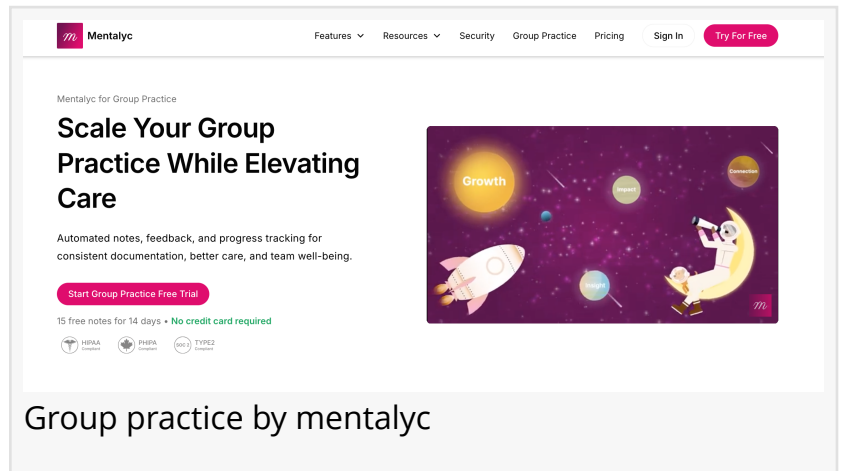

*Maria Szandrach*

For years, independent therapy practices have struggled to keep up with the operational systems of large behavioral health organizations. Hiring administrative staff, managing compliance, and maintaining documentation consistency across multiple therapists have always required heavy infrastructure until now.

With [Mentalyc's Group Practice](#), small teams can now function like fully equipped organizations: compliant, efficient, and data-driven, without the need for complex software or costly overhead.

## Leveling the Playing Field for Small and Growing Clinics

“Mentalyc has cut our documentation time by over 70%. It feels like having a personal assistant for every therapist,” shares Dr. Rachel Lewis, founder of MindPath Counseling, a five-therapist practice in Chicago. “We finally have the freedom to focus on clients instead of compliance.”

Mentalyc's new Group Practice feature provides supervisors, administrators, and team leads with complete visibility and control. Owners can oversee therapist productivity, track documentation completion, and maintain clinical standards — all in one intuitive dashboard.

Built for both scaling solo practices and established clinics, the platform grows with your team. Whether you manage two therapists or fifty, Mentalyc makes the process seamless.

Core advantages include:

**Centralized team management:** View all clinician progress, clients, and notes in real time.

**AI-generated HIPAA-compliant documentation:** Save hours while maintaining professional, audit-ready notes.

**Smart supervision tools:** Support team reviews, training, and oversight across multiple locations.

**Scalable structure:** Add new therapists, admins, and supervisors with one-click onboarding.

**Comprehensive analytics:** Gain deep insights into therapy progress, goal achievement, symptom reduction, and the strength of the therapeutic alliance, helping teams measure real clinical impact and continuous improvement

**Designed for Therapy Teams — Not Just EHR Users**

What makes Mentalyc different from other documentation platforms is its deep specialization in therapy workflows. Rather than adapting generic EHR technology, Mentalyc's AI scribe is trained to recognize the emotional and contextual depth of therapy sessions.

This means every note generated by Mentalyc reflects clinical empathy, session accuracy, and compliance precision — not just word count or keyword triggers.

### Group Practice Features Built For You

#### Easy Clinician Onboarding

Invite therapists in seconds, assign roles, and get your team started on day one—with a free trial for your entire practice.

#### Simple Group Management

Add or remove seats, upgrade plans, and manage billing for your whole practice from a one-place.

#### Practice Owner Oversight

Gain master access to every clinician's session records—review completed notes, track pending approvals, and ensure team-wide compliance.

#### Full-Feature Access At One Rate

Unlock Mentalyc's automated notes, treatment planning, continuous feedback, and progress tracking—all for one simple price.

### Group practice plan by mentalyc

*"Mentalyc has made my personal and professional life so much easier. Not only does it make note-taking quicker and more effective, but it's also HIPAA-compliant. Instead of catching up on notes, I can now spend my free time taking care of myself and making sure I show up as my best version for my clients. I would highly recommend Mentalyc and their Dictation Feature!"*

**Paige Wilson, LICSW**  
Psychotherapist, LICSW - Owner

*"Mentalyc has a unique ability to transcribe and summarize the therapeutic process. It helps me reflect and gain an objective perspective after a session. This way, I can create a stronger conceptualization of the client's individualized path to wellness."*

**Daniel Helvetius**  
Licensed Professional Counselor, MEd, LPC-S, NCC - Practice Owner

### Customers reviews on group practice feature by Mentalyc

“We added three new therapists last quarter without hiring an extra admin. Mentalyc’s automation makes scaling possible without chaos,” says Anthony Rodriguez, owner of HarborBridge Counseling in San Diego. “It’s like having the systems of a Fortune-500 healthcare company, but built for a team of five.”

## The Human Side of AI: Technology Meets Care

Mentalyc blends cutting-edge automation with real-human support. Every group practice receives personalized onboarding, training, and dedicated support tailored to its clinical model.

“Our mission is to make small and mid-sized therapy practices thrive,” explains Maria Szandrach, CEO of Mentalyc.

“We believe independent clinics deserve the same efficiency, compliance, and intelligence tools that large corporate providers have — without losing the human warmth that defines great therapy.”

Mentalyc is also HIPAA- and SOC 2 Type II-compliant, ensuring that every client’s sensitive data remains safe and protected. Security and privacy are non-negotiable, which is why hundreds of clinicians have already made the switch.

## From Burnout to Balance: A Real Change in Practice Management

Therapists across the U.S. report significant improvements after adopting Mentalyc’s Group Practice feature — shorter workdays, reduced stress, and better team alignment. Clinics are now able to expand services, take on new clients, and maintain consistency across therapists — all without the administrative burden that previously limited growth.

“Mentalyc didn’t just improve our operations — it gave us our evenings back,” says Dr. Lewis. “Our therapists are happier, our documentation is stronger, and our clients feel the difference.”

## Affordable, Scalable, and Ready for Every Team

With plans built for both solo practitioners and multi-clinic teams, [Mentalyc’s pricing](#) model makes AI-powered documentation accessible to everyone. Explore pricing options here and see how affordable it is to transform your practice workflow.
