Covid-19 Scenario:

The outbreak of the COVID-19 pandemic had a negative impact on the growth of the global construction machinery attachment market, owing to implementation of global lockdown which resulted to the drastic reduction in construction activities.
Supply chain was disrupted due to import & export restrictions. Manufacturers faced shortage of labor and unavailability of raw materials.
However, the market has already recovered in the post-pandemic.
The research provides detailed segmentation of the global construction machinery attachment market based on attachment type, application, sales channel, end-use industry, and region. The report discusses segments and their sub-segments in detail with the help of tables and figures. Market players and investors can strategize according to the highest revenue-generating and fastest-growing segments mentioned in the report.

Based on attachment type, the excavator buckets segment held the highest share in 2021, accounting for around one-fourth of the global construction machinery attachment market, and is expected to continue its leadership status during the forecast period. This segment is expected to register the highest CAGR of 5.6% from 2022 to 2031.

Based on application, the earthmoving segment accounted for the highest share in 2021, contributing to nearly one-thirds of the global construction machinery attachment market, and is expected to maintain its lead in terms of revenue during the forecast period. This segment is expected to manifest the highest CAGR of 5.5% from 2022 to 2031.

Based on sales channel, the aftermarket segment accounted for the highest share in 2021, holding nearly three-fifths of the global construction machinery attachment market, and is expected to continue its leadership status during the forecast period. However, the OEM segment is estimated to grow at the highest CAGR of 5.2% during the forecast period.

Based on region, Asia-Pacific held the largest share in 2021, contributing to around one-third of the global construction machinery attachment market share, and is projected to maintain its dominant share in terms of revenue in 2031. In addition, the same region is expected to manifest the fastest CAGR of 5.4% during the forecast period.
