

Ronald Morrison's The Imperfect Deception Fuses Science, Magic, and Mystery in a Gripping Global Thriller

An electrifying blend of quantum physics, ancient witchcraft, and artificial intelligence explores how far humanity will go to control reality itself.

NEW YORK CITY, NY, UNITED STATES, October 14, 2025 /EINPresswire.com/ -- In his spellbinding, 5-star rated new novel *The Imperfect Deception*, author Ronald Morrison masterfully combines scientific precision with supernatural intrigue to create a genre-bending story that defies convention. What begins as a husband's desperate search for truth transforms into a globe-spanning adventure that questions the nature of the universe.

When graduate student Nick Price's wife, Erin, is critically injured under mysterious circumstances, the official investigation runs cold. Refusing to accept unanswered questions, Nick enlists the help of Marty, a mathematician; Jason, a quantum physicist; and Molly, a mysterious hacker with secrets of her own. As their pursuit of truth deepens, the group uncovers a chilling link between advanced physics, Nordic witchcraft, and a powerful secret that governs our very existence.

From Arctic villages to covert laboratories, Nick and his allies are hunted by ruthless and powerful enemies determined to silence them. When a new threat emerges that endangers the planet, the stakes escalate from personal to global. Morrison's intricate plotting and technical expertise—drawn from his career as a defense scientist and engineer—lend realism to a story that raises thought-provoking questions about the future of artificial intelligence, the relationship between magic and science, and the essence of reality.

A former U.S. Navy pilot turned consulting scientist, Ronald Morrison brings decades of experience in engineering, artificial intelligence, and defense technology to his fiction. He holds a

The Imperfect Reception by Ronald Morrison

PhD in Information Technology, specializing in biologically inspired AI, and has authored both fiction and nonfiction.
