

Chartered Institute Debuts Certified EU Clinical Trial Project Manager Program to Advance Clinical Research Excellence

The Chartered Institute of Professional Certifications Launches the Certified EU Clinical Trials Project Manager (CCT™) Program

BERLIN, GERMANY, October 28, 2025 /EINPresswire.com/ -- The [Chartered Institute of Professional Certifications](https://www.charteredcertifications.com)

“

With the CCT™ program, we aim to empower professionals with the regulatory knowledge, leadership skills, and operational proficiency necessary to manage compliant and effective EU clinical trials.”

Bok Yan Lo

(www.charteredcertifications.com), a globally recognized authority in certified executive programs and professional development, is proud to announce the launch of its latest certification offering, the Certified EU Clinical Trials Project Manager (CCT™) program. Developed in collaboration with leading clinical research expert, regulatory professional, and industry practitioner as its faculty director, this program is designed to equip participants with advanced knowledge and practical skills essential for managing clinical trials within the European Union’s complex regulatory environment.

The CCT™ program addresses the growing demand for qualified professionals capable of navigating the intricate requirements of the EU Clinical Trials Regulation (EU CTR No. 536/2014), ICH-GCP standards, and EMA oversight frameworks. As clinical research becomes increasingly globalized and regulated, this certification empowers clinical project managers, sponsors, and CRO professionals to ensure compliance, maintain operational excellence, and uphold the highest ethical standards throughout the clinical trial lifecycle.

The comprehensive curriculum of the CCT™ program covers key areas such as EU CTR submission and approval processes, CTIS operations, ethical and safety compliance, vendor and site management, risk-based monitoring, and inspection readiness. The program integrates theory with real-world applications through interactive modules, case studies, and project-based exercises, ensuring participants gain both strategic insight and hands-on operational expertise.

“Clinical trials are the cornerstone of medical innovation, yet they operate under some of the

most rigorous regulatory standards globally,” said Bok Yan Lo, Managing Director of the Chartered Institute of Professional Certifications. “With the CCT™ program, we aim to empower professionals with the regulatory knowledge, leadership skills, and operational proficiency necessary to manage compliant and effective EU clinical trials. This certification will help elevate global standards for clinical trial governance and project delivery.”

The CCT™ program adheres to the highest standards of professional education and has been independently accredited and certified for Continuing Professional Development (CPD). Upon successfully completing the program and passing the certification examination, participants will be awarded the prestigious Certified EU Clinical Trials Project Manager (CCT™) designation. This globally recognized credential is a mark of excellence that validates professional competence in EU clinical trial management, compliance, and regulatory leadership.
