By region, North America garnered the highest share accounting for nearly one-third of the global influencer marketing market revenue in 2022, and is projected to retain its dominance by 2032, owing to factors such as the increase in use of smartphones and enhanced internet connectivity aiding the growth of the influencer marketing market. The Asia-Pacific region is projected to witness the fastest CAGR of 22.6% during the forecast period, owing to increase in availability of high-speed mobile data, as more people in Asia-Pacific have access to the internet, which is expected to fuel the market growth in Asia-Pacific.

By component, the solution segment held the major share in 2022, garnering nearly half of the global influencer marketing market revenue, owing to offers to find influencers and management of platforms that aid brands in meeting and working with the appropriate influencers for their campaigns, campaign tracking, and evaluating the success of influencer partnerships, content creation, and distribution services to guarantee the creation and distribution of high-quality and engaging content. The services segment is expected to also showcase the fastest CAGR of 31.6% during the forecast period, owing to organizations finding the appropriate influencers, creating compelling campaigns, and achieving their marketing goals through successful influencer collaborations by utilizing their knowledge, industry connections, and technology.

By enterprise size, the large enterprise segment accounted for nearly half of the global influencer marketing market share in 2022 and is expected to maintain its dominance by 2032, owing to promoting their goods and services, producing sincere content, and gaining access to the influencers' loyal and attentive fan bases. Influencer marketing presents an opportunity for brands to interact more meaningfully and relatable with their target market, boosting brand loyalty. The small and medium-sized enterprise segment is expected to also display the fastest CAGR of 30.9% throughout the forecast period, owing to performing some predefined

functions/tasks and being designed according to the needs of that particular task.
