*The Business Research
Company*

Expected to soar from \$286.51 billion in 2024 to \$306.27 billion in 2025, the compound annual growth rate (CAGR) stands at 6.9%. Factors such as the advancement of emerging markets, the surge in automobile sales, and the escalation in international trade are key contributors to the growth witnessed during the historical period.

Over the coming years, the automobile logistics market is predicted to experience robust growth, with its worth anticipated to rise to \$424.53 billion by 2029, demonstrating a compound annual growth rate (CAGR) of

8.5%. Factors contributing to this expansion during the predicted period include increased government backing, population growth and urbanization worldwide, heightened production of electric vehicles, and booming online purchases. The prediction period is expected to witness trends like the development of novel technologies to assist in vehicle and inventory transportation, the utilization of electric vehicles (EVs) for efficient last-mile deliveries due to their superb mobility and minimal carbon emissions, an emphasis on partnerships and acquisitions to bolster financial resilience and geographical presence, the creation of sophisticated logistics management platforms for precise vehicle delivery tracking, and the

introduction of new products and solutions to reinforce market standing.

What Are The Factors Driving The Automotive Logistics Market?

The growth of the automotive logistics market is anticipated to be fuelled by the escalating efficiency in finished vehicle logistics. Finished vehicle logistics embody the sequence of steps and procedures that ensure the safe delivery of cars to the final consumers. It concentrates on transferring vehicles from the manufacturer to the end users, either on a domestic or international scale. The automotive industry relies on finished vehicle logistics for the secure delivery of cars and an increase in efficiency in this process would thereby enhance the demand for automotive logistics. For example, it was reported by the International Energy Agency (IEA), an autonomous intergovernmental organization based in France, that the exports of passenger vehicles skyrocketed almost 60% in 2022, exceeding 2.5 million units. Consequently, it was observed that the boosted efficiency in finished vehicle logistics is contributing to the expansion of the automotive logistics market.

Who Are The Major Players In The Automotive Logistics Market?

Major players in the Automotive Logistics include:

- Deutsche Post DHL Group
- Kuehne + Nagel International AG
- DSV A/S
- Deutsche Bahn
- Nippon Express Co., Ltd
- CEVA Logistics AG
- Geodis SA
- Expeditors International
- Penske Automotive Group, Inc
- Kerry Logistics Network Limited

What Are The Prominent Trends In The Automotive Logistics Market?

Key players in the automotive logistics industry are concentrating on innovation and product development, aiming to improve transportation management and augment supply chain operations. They are introducing comprehensive software solutions like integrated logistics platforms that improve and manage every aspect of transportation and supply chain activities, thereby facilitating smooth synchronization between shippers, carriers, and logistics service providers. As an illustration, Cox Automotive, an enterprise from the United States, introduced Central Dispatch Enterprise in June 2024. This innovation is built to enhance and streamline transportation activities for large automotive shippers and brokers. It provides a personalized marketplace with exhaustive abilities that take advantage of proprietary data and market intelligence to boost supply chain management. The platform includes automated processes

and allows for fluid integration through Application Programming Interfaces (APIs). Plus, it has a mobile app for carriers that makes transactions more efficient, thereby offering its clients the requisite tools to boost operational efficiency and increase profitability in the automotive logistics sector.

Which Segment Accounted For The Largest [Automotive Logistics Market Share](#)?

The automotive logistics market covered in this report is segmented –

- 1) By Type: Outsourcing, Insourcing
- 2) By Activity: Warehousing And Handling, Transportation And Handling
- 3) By Mode Of Transport: Roadways, Airways, Railway, Maritime
- 4) By Services: Transportation, Warehousing, Packaging Processes, Integrated Service, Reverse Logistics
- 5) By Distribution: Domestic, International

Subsegments:

- 1) By Outsourcing: Third-Party Logistics (3PL), Fourth-Party Logistics (4PL)
- 2) By Insourcing: In-House Logistics Management, Dedicated Logistics Services
