Significant surge in the demand for roofing application, modern building wall, decoration of commercial building, and others in the constructions sector, increase in the adoption of polycarbonate sheets as a substitute to glass due its impeccable transparency and durability, and remarkable growth of the automobile industry are expected to drive the growth of the North America polycarbonate sheets market. On the other hand, environmental concerns regarding the biodegradability of sheets are predicted to hinder the growth to some extent. However, extensive use of these sheets in building green house is expected to create ample opportunities for the industry.

Based on type, the multiwall segment held the largest market share in 2020, garnering around two-fifths of the global market. The solid segment, on the other hand, is predicted to cite the fastest CAGR of 4.1% during the forecast period.
